

# TRITON®

## INTRODUCING THE NEW!

# TRITON® SUPER DUTY

# 119-GALLON MODEL

The New Triton Super Duty (119-gallon, 500k BTU) is for larger businesses with the greatest hot water demand. Triton's built-in EcoNet® smart monitoring technology with integrated WiFi offers advanced diagnostics, preventive maintenance alerts, energy and water usage reports and scheduling capabilities. Plus, LeakGuard™, the most accurate all-inclusive leak detection and prevention system on the market, eliminates emergencies.

The Triton Family design was guided and influenced by plumbers and perfected by Rheem® Engineering to keep businesses up and running. This smart water heater was designed to be flexible so that it is the ideal solution for both replacement and new construction applications.
