1500°C
- Bridges up to 14 Units

"Wow you guys nailed it. I just did six comparisons to other esthetic zirconia and this is by far better!!!"

- Scott Bowman
William Scott Dental Studio

*The L or "Light" shades are designed to match the incisal third. They have less chroma than the standard A1 and A2 shades allowing for more customization with shade liquids, modifiers, or stain.

**As compared to traditional zirconia
