WOODTRICK.COM

WoodTrick gives our clients the pleasure of complex tasks solving.

«WOOD TRICK EUROPE LLC» (Poland, Krakow) is a rapidly growing brand with more than five years dedicated to successfully designing, producing, and selling mechanical, prefabricated three-dimensional constructor kits and figured puzzles.

The best engineers and designers created our product so that you can enjoy the assembling process to the fullest extent. WoodTrick designs are precise, high-quality models, ranging from simple to pro-level engineering feats. Made completely with 100% natural wood, the laser-cut parts come together in your hands vintage and modern machinery, mechanical and electronic mechanisms and special forces tools. Wood Trick creations give you the feeling of genuine mechanics in your hands. Every step, from the unpacking to the final installation, is a true engineering joy.

WHAT MAKES US SPECIAL?

OUR ENGINEERS

Our main USP is our ENGINEERS, who know how to make interesting and captivating mechanisms. We are proud of their skill and ability to design unique items and bring them to life. It help us to create exclusive range for WoodTrick and its clients.

PROFESSIONAL MODELS WE CREATE

Our model kits are designed for adults. By marketing our product as pro-level, we differentiate from competitors who mostly market theirs as toys. The models are arranged by complexity level, from 2 to 5. Brand WoodTrick doesn't have a basic level 1. However, We can create models of any level for your brand.

ONLY NATURAL WOOD

The models are made entirely of natural wood. Our constructor kits are made of safe, pollutant-free wood, targeting the current international demand for eco-friendly toys. There is no glue or any toxic materials used in the production or assembly of the models. Detailed instructions with images are included in every package to guide users on how to complete these challenging and rewarding models.

HIGH-QUALITY MECHANISM

Our company is dedicated to producing superb quality mechanical constructors. We rely on advanced cutting and shaping technologies and stringent quality control standards at each stage of production to ensure safety. Our company's focus on quality spans the entire process, from gathering raw materials to final packaging and delivery.

OUR MANUFACTURER

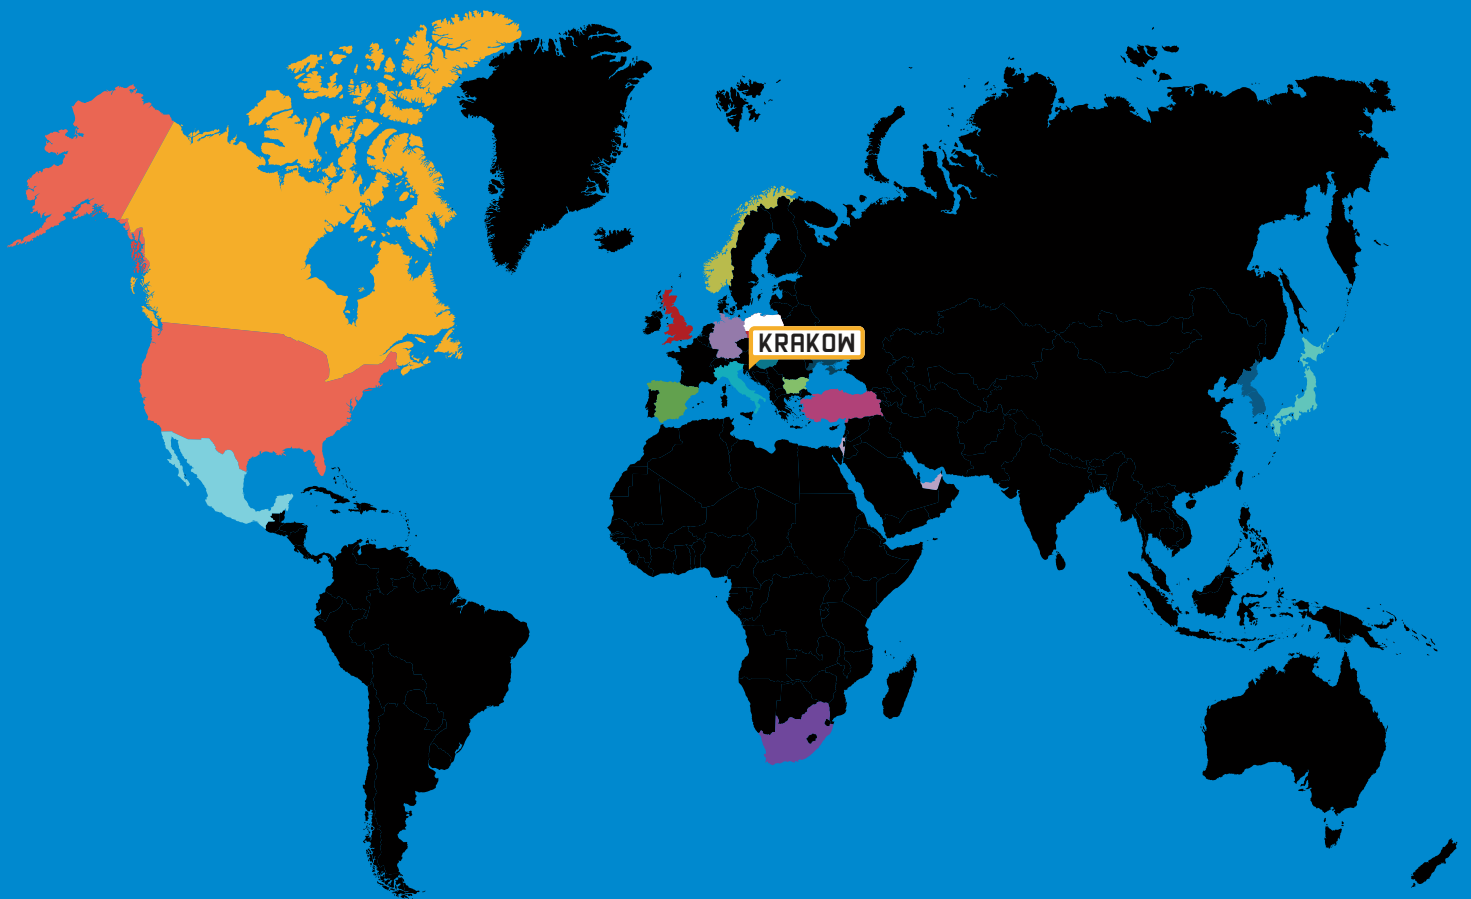

Our production facilities have a complete production cycle and work around the clock to convert high-quality wood into beautiful construction kits.

TARGET AUDIENCE

Our products are aimed at a wide-ranging target audience, including adults, young adults, and children of suitable age with parental supervision. WoodTrick sets are a terrific way to be exposed to the world of engineering!

Our target audience is creative, logical thinkers. We create our models for:

- those who are fans of modeling and mechanisms.
- those who like to create.
- those who are looking for a gift for loved ones.
- those people who want to spend time together.

WELCOME TO THE WOODTRICK

amusement park!
Met the WoodTrick Ride wooden construction set by WOODTRICK. This model will appeal to those who love going on the most extreme rides. Steep climbs and sudden descents give you a thrill and produce so much adrenaline that it will be remembered for a long time. Build the best roller coaster of your dreams and become the biggest amusement park tycoon in the world.

It's very easy to control the model. Just turn on the remote control and the carts will go on a crazy track. The radio-controlled souvenir and collection model is equipped with an electric motor and guarantees a smooth movement. All the guests' attention is attracted by the dinosaur calling for a really powerful drive. Take a ride on the extreme WOODTRICK roller coaster.

This assembly model from WoodTrick would make an excellent gift for a family with kids. Parents will assemble the WoodTrick Ride following the instructions for the assembly kit, and the kids will love playing with the extreme slides!

GALAXY MARBLE RUN

VIDEO

THE GALAXY MARBLE RUN

is one of the most expensive, beautiful, and complex sets in the WoodTrick line designed. The set combined three steepest tracks with sharp turns, steps, swings, and descents, as well as a rotating planet of unique shape. Tracks are cyclical. The continuous operation of the wooden construction set is provided by a planetary lift powered by an electric motor - the launched ball passes through all obstacles and rises again to a height. It is equipped with 12 metal balls that move sequentially one after another rising and then disperse along different tracks creating a fascinating image that immerses you in the technical world.

The peculiarity of this collectible set is the uniform and smooth operation of all mechanisms, without jerks and stops, which is provided by the gimbal drive. You need to lift a special cover to take out AA batteries.

The Galaxy Marble Run wooden construction set by WoodTrick has become an outstanding construction set that has combined eco-friendly materials with modern technologies. This is a unique gift that will definitely be appreciated and the right step to developing technical thinking!

WOOD
TRICK

SPACE JUNK ROBOT

educational construction set for children. It not only entertains but also develops thinking, gives the opportunity to become an engineer of a fantastic cyber world of wooden robots. Now all progressive humanity is concerned about environmental issues and is responsible for garbage collection. The space cleaning robot fits perfectly into this trend. According to legend, it moves from planet to planet and puts everything in order, collecting garbage.

It can be any object weighing up to 100 grams: paper clips, batteries, buttons, beads, etc. Mobile eyes, the sharpest front teeth - all this will definitely make children and adults smile. The robot has four wheels to move around.

The robot is equipped with infrared distance sensors and reacts to the approach of the hand. As soon as something gets within the visible distance of the sensors (from 10 to 15 centimeters), the red backlight switches on. The bucket is driven by a servo drive. The robot is powered by four AAA batteries. The running time largely depends on both the battery manufacturer and the intensity of lifting loads. The Space junk robot is a great gift for both children and adults.

SHOOTING RANGE

THE ROBOTIC MODEL

Shooting Range by Wood Trick is a unique smart toy in the field of robotics, combining eco-friendly plywood and modern electronics, developing logical thinking, forming practical skills of working with electronic devices and wooden mechanisms. After constructing it, you will get an exciting game - robotic model Shooting Range. This game can be played either alone or together with friends armed with any children's weapons. The goal of the game is to prevent the invasion of alien invaders and protect humanity. And only an accurate shooter will cope with the task and repel numerous attacks of combat droids.

The game has ten missions, in each of which you will have to face not only a different number of enemies but also different classes of droids, from a scout to an enhanced combat droid.

Therefore, you will need significant ammunition. The set includes a pistol with two clips of 8 bullets each but you can use any type of children's weapons. For example, it can be a nerf or an airsoft rifle. The main thing is to take into account the shooting power of your weapon, so as not to break the target.

PUZZLE LIKERS ARE SURE

to be attracted by the new Wood Trick souvenir and collection model designed in the post-apocalyptic style and called Mad Buggy. This construction set is made of high-quality and safe material. It includes 322 pieces together with a detailed and illustrated manual.

The Mad Buggy wooden puzzle is equipped with a spring motor. This item implements a piston system, which allows you to observe the work of the engine. Besides, an independent suspension is used here for maximum comfort and to ensure a balanced surface clutching while passing any bumps. Therefore, if properly assembled, the Mad Buggy can drive up to 8 meters overcoming various obstacles.

The unique WoodTrick model would be a great gift for a teenager or an adult. It will not only give joy during the assembly, but also allow you to have a great time with your loved ones. After the assembly the set can be used for games or interior decoration.

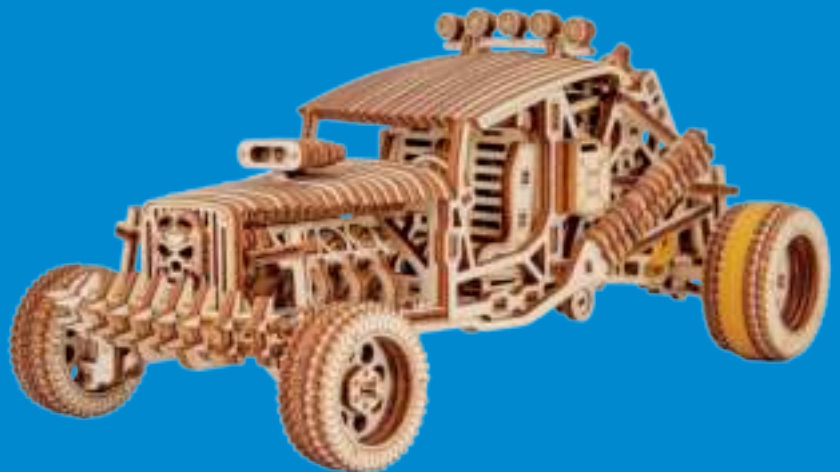

The Buggy is the car of all extreme riders and fans of the movie "Mad Max". Assembling Crazy Buggy from WoodTrick, you will feel the drive that all racers who participate in buggy races experience.

MONSTER TRUCK

YOUR CHILD IS JUST CRAZY

about the Monster Truck?

Present this unique puzzle with their favorite character to them. The wooden model Monster Truck by WoodTrick will also interest adults who like to play with various construction sets or just collect 3D models.

This Monster Truck prototype is equipped with a spring motor. In order to start it up you have to make 8 or 9 full turns of a handle, which will set this off-road vehicle in motion. If assembled correctly, the car easily covers a distance of 5 or 6 meters. That can be done not only by an adult, but also by a child. Such a procedure helps to develop fine motor skills and captures even of a nimble fidget for quite a time. And after assembling you can play with this Monster all evenings long.

The car looks very realistic from both outside and inside. This souvenir collectable model will become a great Birthday, New Year or Christmas present for a child, but moreover, grown up men would also wish to obtain it. An assembled wooden Monster Truck will enlarge your 3D puzzle collection or just become an original designer piece of interior decoration.

**WOOD
TRICK**

THE WOODEN CONSTRUCTOR

Motorcycle DMS received a detailed engine, detailing of such elements as front and rear brake, gearshift pedal. In the process of development, each node was worked out, and the chain was replaced by a gear drive. Operated by a unique rubber band motor, the Motorbike model kit by WoodTrick will give you uninterrupted rolling straight ahead for about 9-16 ft (3-5 meters) until the rubber-band motor's resource is completely released. We can say with 100% confidence that our model will greatly interest you and give you a sea of unforgettable emotions.

It only takes 3 hours to assemble the Motorcycle DMS from WoodTrick. The assembly kit includes 203 parts from which you will make a model of a real motorcycle. The process will be fascinating and fun, and the finished model will decorate the interior and become a great toy.

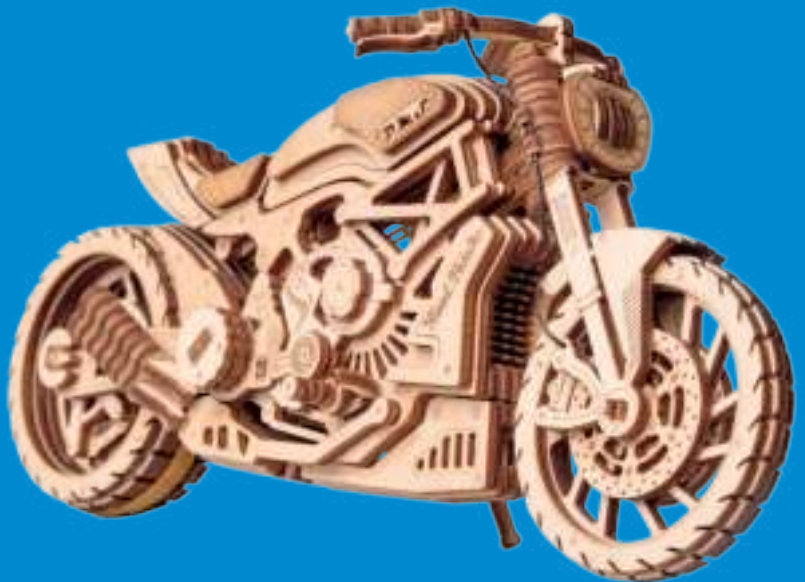

Such a model will please all motorcycle enthusiasts and remind you of the pleasant feeling of freedom when you get behind the wheel of a motorcycle and hit the road. Feel the speed with the Motorcycle DMS prefabricated wood model!

TRACTOR

UNIVERSAL TILLING TRACTOR

is one of the most high-performance models of WoodTrick construction sets:

- you can see the piston movement under the bonnet;
- can turn the front wheels to set the correct tractor driving direction;
- you can open the bonnet just pulling the lever in driver's cabin;
- tractor's doors may be opened, and passenger seats are adjustable;
- the tractor may ride at neutral speed or at full speed.

It takes 6-8 hours to assemble the tractor model, and if you do it together with friends or family, you can do it even faster! The assembly kit includes 401 parts. Following the instructions, you will assemble a small working tractor that can drive and be very similar to the real thing.

Enjoy an exciting constructor and have a good time without harming the environment. Our model tractor is made of environmentally friendly plywood and can be assembled without glue. Such a tractor will decorate your table or shelf and delight any fan of various machines!

WOODTRICK'S OCEAN EXPLORER

Yacht wooden construction set will be a great gift for oceanography likers and young researchers. It is excellently detailed, which allows you to plunge your child into the world of research technology, underwater beauty and important discoveries – this was made possible thanks to a successful combination of traditional materials and modern technological solutions.

The model of the boat was inspired by the famous Calisto ship. Jacques-Yves Cousteau was hand-equipped this research vessel, the world-famous oceanographer and inventor of scuba diving. Much of the equipment on Calisto Jacques-Yves Cousteau designed himself, making a huge contribution to the study of the sea depths.

The Ocean Exploration Yacht model is quite challenging to assemble. It includes 565 pieces, but following the instructions that come with it will allow you to assemble this wooden model yourself. It may take 6 to 8 hours to assemble our boat. To speed up the process, you can assemble the Ocean Explorer Yacht with your family – you will have a great time and create an attractive prefabricated model with your own hands!

MARS ROVER

COMBINING TRADITIONAL WOODEN

elements and new technological possibilities, Wood Trick has created a real find for space likers – the souvenir collectible Mars Rover model. It has everything to quickly involve a child in the exciting process of learning astronomy and other related sciences. NASA's Mars Perseverance rover was taken as a basis.

An analogue of a belt drive (with a rubber band instead of a belt) that ensures the rotation of the driving wheels is responsible for the mobility of the wooden rover. The suspension is implemented in a similar way – the assembled model simulates movement on Martian soil, similarly to the original, which is millions of kilometers away from the Earth. Thanks to this wooden 3D construction set, the child will be able to carry out their mission to Mars, receiving genuine joy from the work done and the skills acquired.

The construction set is versatile and does not require special tools or glue for assembly. If necessary, you can replace the drive and suspension rubber bands without complete disassembling of the rover.

HAVE YOU EVER

wanted to become an engineer?

Our Oil Derrick is the most entertaining among all 3d wooden puzzles for kids and adults to build.

Assemble your very own oil derrick yourself using high-quality plywood parts. The Oil Derrick is equipped with step-by-step illustrated instructions. Get firsthand experience with pumping mechanisms behind full-scale oil pumps as you put them together. A beautiful and educational toy will surprise anyone.

Our wooden Oil Derrick model will also appeal to all fans of the movie Armageddon starring Bruce Willis. You can learn more about how oil rigs work and have fun building the model yourself or with friends.

With 120 pieces, it will take you three to five hours to put the entire model together. But time flies quickly, as the puzzle-like spectacle will transport you to another world.

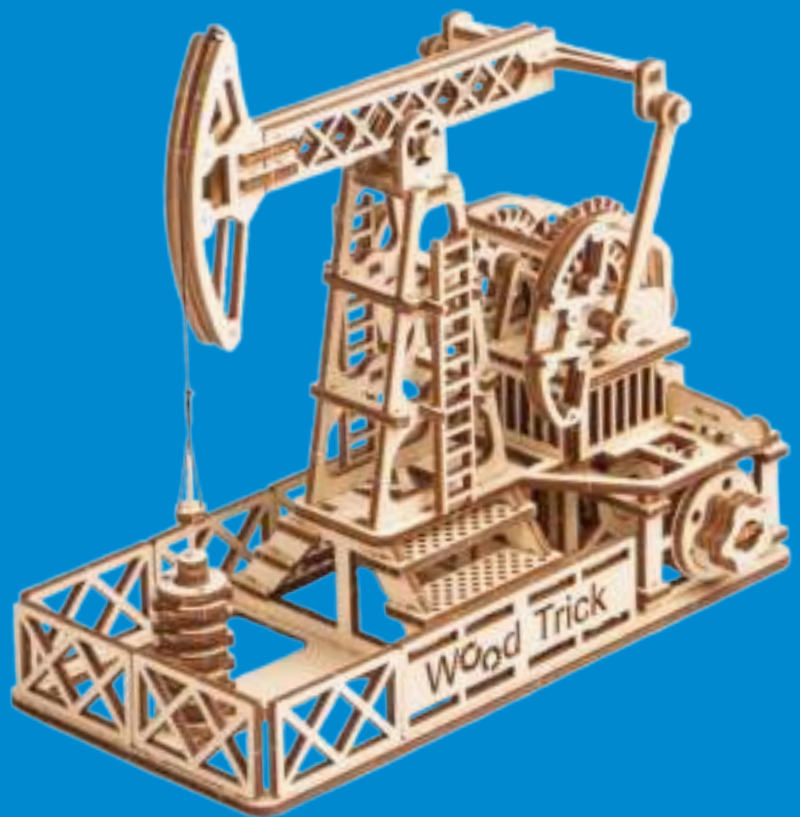

Such a model will look good on your desk or decorate a shelf in your room. You can give this set as a gift to anyone fond of technique and various mechanisms!

AN IMPRESSIVE BIG RIG

realistic semi truck model from WoodTrick to flex your brain.

Big Rig is a powerful truck that has a transmission and other mechanisms like in a real vehicle. The model is an embodiment of the advanced level of complexity for true connoisseurs. Through precisely cut out details you can see realistically moving mechanisms inside of Big Rig. A 4-stroke engine with a knee shaft will be visible when you'll open a bonnet hood. The interior details of the vehicle are designed with an eye for the real ones and could be perfect for the experts. This will definitely amaze the motorists and bring aesthetic pleasure in assembly process.

Big Rig is one of the most challenging wooden models to assemble. But you'll enjoy the assembly process: the eight hours it takes to assemble Big Rig will be remembered as exciting and thrilling moments. Building a real (albeit scaled-down) machine from the individual parts makes you feel like a real engineer.

Detailed instructions make the assembly process more accessible. All in all, Big Rig by WoodTrick consists of 485 pieces, carefully crafted by our specialists.

SOUVENIR-LIKE COLLECTION MODEL

Lyra da Vinci by WoodTrick Company is a perfect gift for music and puzzle lovers. But in any case, a fascinating pastime awaits you.

The carved case of Lyra da Vinci musical instrument allows you to observe the gearbox operation, the pressing of key combinations, and the string tensioning mechanism. Two separate strings provide the magical sound of the model. Through the openings in the case, you can even see the movement of miniature gears while the mechanism sounds.

Special attention should be paid to the case decoration, the striking element of which is an interesting side edge, as well as the applied carved pattern. Open the top lid to observe the change in string operation.

Lyra da Vinci wood building set is a unique symbiosis of mechanics and sound. Having correctly assembled the model, you can not only see the mechanism working, but also enjoy the pleasant melody that the lyre emits.

This model will be an excellent purchase and an ideal gift for your relatives or friends. This is an original gift that is sure to be appreciated!

FAIRY THEATER

THE FAIRY THEATER

by

WoodTrick wooden model is an ideal gift for puzzle and art fans. Its assembling will be an exciting activity for both adults and children. The whole process is quite simple and convenient. No need to additionally use toothpicks and other auxiliary items.

The mechanism of the theater is activated by a simple rotation of the handle, after which the performance begins. The main characters are 6 fairy tale characters.

The whole action is accompanied by the Happy Birthday song. The structure has a place to set with a 3x4 photo.

Fairy Theater is an exciting souvenir and collection model that will catch all art lovers' fancy. However, to enjoy the performance, you need to assemble the theater by yourself.

The characters of Fairy Theater are characters from the famous fairy tale "Alice in Wonderland". All fans of this unusual story by Lewis Carroll will appreciate the gift and gladly assemble the model from wood by hand. Cope with this task can be fast enough – about two to three hours. The detailed instructions will help you to do it.

GRAND PIANO

THIS MODEL WILL

become a wonderful supplement to your interior that will delight you with a beautiful Moonlight Sonata melody!

You will be able to introduce your children to the world music classics as well as encourage imaginative artistic thinking!

Our designers made it possible to demonstrate the elegance of this instrument, and the enchanting power of music in this beautiful model. A few turns of the lever, and you enjoy the melody.

In addition, Grand Piano will be easy to assemble — you will spend only two or three hours for this process, and you will enjoy the musical wooden assembled model for many days, weeks, and months in a row.

The sound of the Moonlight Sonata can transport you to incredible places and remote corners of our planet. This tune inspires creativity, soothes the soul, and is a great way to begin your introduction to the vast world of classical music.

You can play the music anytime — before you go to sleep, when you're tired from work, or when you want to brighten up your ordinary day with something beautiful. Our wooden prefabricated model will help you do just that!

HAVE YOU EVER

wanted to have your own famous Mayan Calendar? Well, now you can!

The Mayan Calendar will be an excellent addition to the interior of your home, as well as help you always be aware of day, week, month and year!

Want to stimulate your child's mental processes at an early age? Begin with this starter kit of a mechanical model of a Mayan Calendar from WoodTrick.

In addition, collecting the Mayan Calendar will be interesting even for an adult. This ancient culture had many mysteries and became famous as one of the most developed cultures of its time. Putting together the Wood Trick Mayan Calendar will give you a glimpse into the secrets of these people, and have a good time.

Assembling the wooden model will be easy, especially if you carefully follow the instructions that come with it. The two and a half hours will fly by like a minute, but the result will please you for a long time to come! Hang it on your wall or put it on a shelf and admire the outcome of your work every day.

WOODEN PENDULUM CLOCK

kit from

WoodTrick will be a perfect decoration that looks captivating in the finished product!

Once fully wound, this wooden pendulum wall clock will run for 12 hours.

Easy wall mount with double eyelet holes. Please note that the Pendulum Wall Clock Kit comes without wall attachment. Comes with a very detailed assembly instruction with pictures.

In order to wind up the clock, pull down the left thread while holding the weight.

The WoodTrick company has developed a unique model called Pendulum Clock that has a very similar mechanism to Huygens's original clock! The impeccable design and high quality of the clock will not leave anyone indifferent!

This clock will show the exact time and decorate your room, becoming a highlight of the interior. It will look good in the kitchen, living room, or bedroom. You can give this clock a gift to a fan of unusual things and exciting puzzles, or buy it for yourself and assemble this wooden model from WoodTrick as a family!

WOODTRICK INTRODUCES you

to the world of mixed technologies. The Space junk robot is more than just a toy for children. It not only entertains but also develops thinking, gives the opportunity to become an engineer of a fantastic cyber world of wooden robots. You can build a working robot model from more than 300 parts.

Now all progressive humanity is concerned about environmental issues and is responsible for garbage collection. The space cleaning robot fits perfectly into this trend. According to legend, it moves from planet to planet and puts everything in order, collecting garbage.

It accumulates various items, which you put into its bucket. It can be any object weighing up to 100 grams: paper clips, batteries, buttons, beads, etc. For example, the robot easily lifts two batteries.

At the same time, the lifting process looks funny. Mobile eyes, the sharpest front teeth – all this will definitely make children and adults smile. The robot has four wheels to move around. The mechanism of the souvenir-collector's model is activated by squeezing the levers on the "back" of the robot.

THIS AMAZING LOCOMOTIVE

model from WoodTrick will take you to the horizon and beyond.

Mechanical Locomotive from WoodTrick comes with a trailer and a part of a railway that the train can actually ride. The trailer is attached to the locomotive using a special latch.

Locomotive R17 has a switch direction: forward, neutral and reverse.

The signature wind up engine never tires and will carry its weight day and night. And in the meanwhile, you can try out all of the numerous movable parts of this incredibly interactive toy.

The Locomotive model is suitable for all railroad fans and those who have dreamed of building a model at home since childhood. The most realistic and detailed, it will show you how trains work. The difficulty of assembling the model is relatively serious - we at WoodTrick do not create models of the most accessible level of complexity. We do this for you can feel real engineering joy. Plus, this wooden model will be great fun. You can assemble it by following the detailed instructions and putting the assembled model to decorate your table or shelf.

PLANE

HAVE YOU EVER

dreamed of becoming a pilot?

A building your own plane is an accomplishment that only a few had experienced. Assembling the Wood Trick two-seater plane is not like most other model airplanes: this wooden toy is safe from hobby-glues, paints, or other potentially toxic materials. Build and display this beautiful piece, or use it as a tool to bring out your child's hidden talent for aviation or aerospace engineering.

Maybe your child will be the one to develop the next technology that takes man even further towards the stars!

Our wooden airplane will amaze you with its details and how much it resembles a real aircraft. The prefabricated model plane has moving parts: wheels, a nose propeller, and tail. We wanted to create the most accurate copy of one of the first planes, so we considered even the smallest details.

Don't worry: detailed instructions help you build this wooden model.

Both adults and children will enjoy this fascinating and easy process, and the completed model can decorate your desk.

THE WOODEN SOUVENIR-COLLECTION

model Hot Rod, created based on American cars of the 30s.

In a wooden constructor, the V8 engine, a classic body, spoke wide wheels, and a well-developed interior are clearly highlighted. This constructor travels about 6-7 meters. The winding is carried out with a special key; the presence of the gearbox allows the model to move equally, in both directions. The descent is intuitive to use.

This model is great for all vintage car enthusiasts, whether they are collectors of actual cars or those interested in them purely from a scientific point of view. Assembling such a model, you will learn more about American cars' design and internal structure of the thirties. In addition, collecting wooden models will be very interesting! We tried to make it as detailed as possible so that you will be 100% satisfied with the result and you can brag to your friends about what a beautiful car you have made with your hands.

We created our wooden hot rod prefab model so that all lovers of old vehicles could add this beauty to their collection! The WoodTrick Hot Rod wood constructor is ideal for both gift and family fun.

ATLANTIC EXPRESS

ATLANTIC IS THE LEGENDARY name of the legendary trains.

The WoodTrick Company presents a new model – Atlantic Express.

The train is based on the well-known 4-4-2 Atlantic wheel formula. In many ways, the 4-4-2 Atlantic model marked the beginning of the “modern” era of steam train design and development.

The Atlantic Express wooden construction set by the WoodTrick Company is equipped with a rubber motor with a switchable drive, due to which the model can be set in motion. A double link system is implemented on the wheel pairs. The swivel truck with position fixation is installed in front. The car is designed on the basis of the “Beavertail” Observation car. It consists of a bedroom and a lounge area organized by furniture compositions.

The Atlantic Express souvenir model complemented the collection of trains by the WoodTrick. You can get acquainted with the small-sized Chug-Chug Train, as well as the best-selling Locomotive R17. The collection of trains is an ideal gift for any holiday.

DO YOU WANT TO

make a boy happy?

Present him with WoodTrick's wooden Defenders gun, which remarkably resembles a real weapon. The concise and neat design with a careful elaboration of details gives it realism. The model is made of the highest quality materials and is impeccably detailed.

Boys' games are fast and active. It is due to the fact that growing up, boys feel more and more energy inside themselves, which makes them real fidgets. This wooden construction set will make the boy feel like a real courageous defender who is always ready to come to the rescue. The Defenders gun fires wooden bullets coming together with it.

In addition, Defenders Gun is entirely safe. Yes, it shoots wooden bullets, but its speed and weight guarantee that no one will get hurt while playing. But remember: even with these bullets, it's better not to shoot in the face.

The WoodTrick toy weapon is a great way to build courage and bravery in the boy. With this wooden construction set a child will be able to learn how to shoot and, having become a marksman, prove himself a defender and a real hero and give free rein to his imagination.

CYBER GUN

HAVING BEEN INSPIRED

by fantasy and future technologies, which are harmoniously reflected in the style of cyberpunk, we release Cyber Gun.

Bright and stylish toy gun will not leave indifferent boys of all ages. The wooden construction set has received complex and detailed elaboration.

The original model "Cyber Gun" has 2 interchangeable clips, which are loaded with rubber bands. Loading of the wooden gun became easier and faster thanks to automatic opening of the top cover. This allows you spending a more interesting form of leisure time than just playing computer "shooters". The child will be able to use the child's gun for active games in a company as well as play itself training in a target shooting.

This trend model of WoodTrick will be ideal for fans of new impressions. Also, the Cyber Gun would make a great prop for games, parties, and other events, especially if you want to make them cyber-themed. Putting together a wooden Cyber Gun will be easy: the kit comes with detailed instructions, and the process itself will be exciting and fun for anyone.

Cyber Gun is a fantastic style of the future.

IMPRESSIVE ASSAULT GUN

AR-T wooden model kit by WoodTrick.

A cool and perfectly safe 3d wooden toy gun to build for both adults and kids! Shoots up to 25 feet, but don't worry, the bullets are harmless.

Also, a special feature is the presence of a holder for a laser pointer, which makes it possible to diversify your entertainment games. Telescoping buttstock length can be adjusted for greater convenience and realism. There's a total of 44 bullets in this wood model set. This model has several advantages. Assault Gun AR-T is interesting to assemble, and it is a model that you will remember for a long time. This wooden model is also very versatile. You can arrange a kind of competition with your friends, trying to determine who shoots more accurately. Also, you can buy Assault Gun AR-T as a gift for fans of unusual weapons or exciting games. In addition, such a gun will be completely safe in use. Entertain your leisure time together with the wooden Assault Gun AR-T from WoodTrick! You can order a set of guns at once for a large company and arrange something like paintball at the cottage.

SHOTGUN SG-12

THE SHOTGUN SG-12

wooden construction set by WoodTrick will be an excellent choice for weapons lovers. The set can to quickly interest, stimulate the development of logic and technical thinking.

Everyone will be able to touch the unique world of gun mechanics since Shotgun SG-12 presents the kinematics of real mechanisms: a sliding forearm, sending cartridges, an ergonomic handle, a shotgun sight, as well as a magazine for 8 cartridges. The design provides the attachment of spare bullets for quick reloading.

The firing mechanism with elastic bands provides a high fire rate of a shotgun with a shot range of 6-7 meters. The use of wooden bullets and a small effort when preparing a shot make the construction set as safe as possible. The set includes 36 bullets.

The well-thought-out design of the collectible set makes it easy to change the elastic bands responsible for the shooting power without complete set disassembly.

The Shotgun SG-12 wooden construction set can become a real exhibit or a decorative element in the interior of any room.
