

# Garden Lock

One part water based binder for stones and chips.

Garden Lock is a one part water based binder which possesses a high level of UV resistance and water resistance in the cured form and provides an excellent bond to a variety of stones and chips.

**FEATURES:**

- Water Based
- Non Toxic
- Fast Drying

**APPLICATIONS INCLUDE:**

- Tree Surrounds
- Top of pot plants
- Garden Beds
- Binding stones or chips for garden paths
- Art & Craft applications
- Pedestrian pathways

**DIRECTIONS FOR USE:**

- Ensure Stone or chips are clean and dry before use
- Ratio of stones / chips to Binder is 4% binder content (eg 10 kg of stones / chips to 400 gms of Garden Lock)
- First add the stones / chips into a clean bucket or wheel barrow (with plastic liner) before adding the Garden Lock
- Ensure you are wearing gloves and then mix the garden lock in with the stones / chips for approx. 4 minutes until all the stones / chips have a generous coating all over.
- Now place the stones / chips into your desired position and not disturbing them for at least 24 hrs whilst the binder locks the stones / chips together.

**PRECAUTIONS:**

- For best results please ensure accurate amount of binder is used at all times.
- Do not apply directly onto your plants, leave at least 50mm around the stem of the plant.

**STORAGE & HANDLING:**

**Storage:**

For optimum shelf life store in tightly closed, original containers out of direct sunlight between 15°C to 25°C and be protected from freezing. Close containers air tight after use. For best performance, use Garden Lock within 12 months. For any information pertaining to disposal of Garden Lock, refer to the Safety Data Sheet

**DISPOSAL:**

Please dispose of empty container and residue in accordance with your local waste management regulations.

**HEALTH & SAFETY:**

In use, please ensure that Occupational Health and Safety requirements are observed. If swallowed, give plenty of water. Do not induce vomiting. Seek medical attention.

**Skin:** Wash off with warm water and soap.

**Eyes:** Irrigate with water for 10 minutes and see a doctor.
