

TRUMAN'S

Inside the Truman's Starter Kit

Welcome to uncluttered cleaning. Our four non-toxic cleaners safely and effectively tackle virtually all of a home's hard surfaces. Meet your new best friends.

EVERYTHING AND THE KITCHEN SINK

There's no use crying over spilled milk. Unless you were thirsty. Then cry.

Works on appliances (inside and out), cabinets, countertops (granite, laminate, Corian and Formica), stovetops, range hoods, sinks, stainless steel and grills.

Smells like a garden.

FLOORS TRULY

Floors so clean you SHOULD eat off them.

Works on flooring surfaces such as hardwood, bamboo, marble, ceramic tile, laminate flooring, stone, linoleum, concrete and quarry tile.

Smells like a flowerbed.

MORE SHOWER TO YOU

Maybe we should wait 30 or 45 minutes before we go in there.

Works on toilets, sinks, tubs, showers, tile (ceramic, glazed and porcelain), grout, shower doors and curtains, and bathroom fixtures. (Please don't use me on stone or marble. That's Floors Truly's job.)

Smells like citrus.

THE GLASS IS ALWAYS CLEANER

The days of streaking are over. But skinny-dipping is still OK.

Works on mirrors and windows. I also clean computer and television screens, phones and tablets. Just spray me on a cloth first and then wipe gently.

Smells like fragrance-free deodorant. (I'm scentless.)

Refill Kits

Say hello to our little friends.

Each cleaner's Refill Kit includes four cartridges, providing six months of cleaning euphoria. Simply remove and recycle your used Truman's cartridge then refill the bottle with water. Place your refill in the neck

of the bottle, insert the sprayer and twist (and shout). Each cartridge reduces plastic waste by more than 90 percent compared to a typical single-use cleaner.
