Digital Thermometer and Hygrometer LT-2 Operation Instructions

**General features:**
LT-2 is a cabinet and exquisite ultra thin digital thermometer and hygrometer. It could simultaneous display of temperature and humidity, memorize the Max. and Min. temperature and humidity values, switch between °C and °F. Suitable for household, green house, office and labs.

**Technical parameters:**
- Temperature measuring range: -5°C ~ +50°C (23°F ~ 122°F)
- Humidity measuring range: 30%RH ~ 90%RH
- Resolution: 1
- Accuracy: temperature: ±1°C;
- Power supply: DC3.0V, one button cell CR2032

**Operation instructions:**
- Power on: Place the switch to “ON”, LCD displays full screen and then displays the measuring temperature value for 2 sec.
- °C/°F: switch between °C and °F.
- Min: Display the memorized Min. temperature and humidity values.
- Max: Display the memorized Max. temperature and humidity values.

**Notice:**
- LCD displays faintly when the button cell is in low power. Please replace it.
- Battery replacement: Pull out the battery box and put into one battery with right polarity, then push into the battery box.
