- **Alarm/Mark failed**
- **Current readings**

**LCD Menu**

Press the left key to view the content of each page. Press the right key in any page to return to the first page.

**Precautions**

- Please read the manual carefully before using the logger.
- To synchronize system time, it is recommended to connect the logger to a computer for parameter configuration before it is used for the first time.
- The LCD screen is off after 15 seconds of inactivity. Press the left key to light it.
- Never dismantle the battery. Do not remove it if the logger is running.
- Replace the battery in time for long distance transport. If the power remains half.
- Replace old battery with a new CR2032 button cell with the negative inward.

**Application**

The data logger is mainly used to monitor the temperature of food, medicine, chemicals and other products in storage and transport. It can be widely applied to all links of warehousing and cold-chain logistics, such as refrigerated containers, refrigerated trucks, cooler boxes, cold storage, laboratories, etc.
