

COVID-19

Cleaning Recommendations for ROOM Phone Booths

In light of the uncertainty surrounding COVID-19, we are providing a series of best practices for the safe cleaning of your ROOM phone booth to ensure that you and your workforce remain in the best of health.

- 01** The cleaning of visibly dirty surfaces followed by disinfection is a best practice measure for prevention in community settings. For this reason, we recommend strict adherence to the [CDC's General Recommendations for Routine Cleaning and Disinfection of Household Surfaces](#), which are applicable to office furniture and specifically, our ROOM phone booths.
- 02** Recommended cleaning agents to be used on ROOM's products include Clorox disinfecting wipes, Clorox disinfecting spray, Lysol professional disinfectant spray and any of the [Quaternary Ammonium products](#) recommended by the CDC.
- 03** Post your use of disinfecting agents to clean your booth, be sure to leave the booth door open for at least 60 minutes to allow adequate time for aerosols and sprays to disperse.
- 04** DO NOT use any cleaners or disinfecting agents containing bleach or alcohol.

If you have additional questions on cleaning guidelines and choice products for your ROOM phone booth, please contact us at support@room.com.
