11.	Double Sided Tape	Peel all three pieces before installing
12.	USB Wire	Used to connect STORMp3 to computer
13.	Reset Button	Located on back of STORMp3

Getting Started: Connecting To Your Computer

Open the battery compartment to locate the USB port (#1). Using the included USB wire, connect your STORMp3 to your computer. You will see a STORMp3 icon appear on your computer screen. Open that file to begin. The batteries do not need to be installed when connecting your STORMp3 to your computer with your USB wire

USB port on computer

#1
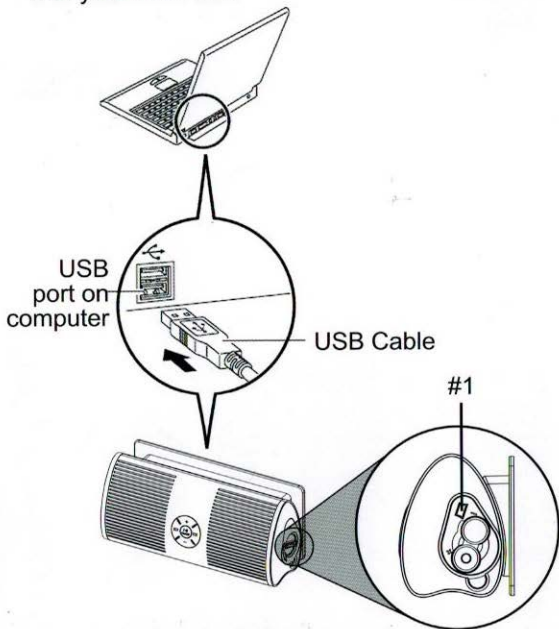

Adding Music

You can transfer music from your computer to your STORMp3 by using the drag and drop method.

1). Connect STORMp3 to your computer with the USB wire (allow up to 20 seconds for the computer and STORMp3 to sync).

   a). **For Mac:** a STORMp3 icon will appear on your main screen

   b). **For PC:** a pop up screen will appear. Choose "open folder to view files"

2). Open your music library that contains your music files on your computer.

3). With both your music library folder and STORMp3 file folder open on your computer screen, click and hold the song file you would like from your computer library folder. Then drag it over to the STORMp3 file folder. Transfer individual songs or multiple songs at a time, but please don't add multiple different FOLDERS of songs onto STORMp3. This will affect the shuffle play.

4). Once you're done adding your songs, make sure you disconnect the STORMp3 correctly. This will avoid any songs from getting lost:

   a). **For Mac:** Click and hold the STORMp3 icon on your computer main page. You will see the trash can icon become an EJECT icon. Now drop the STORMp3 icon over the EJECT icon.

   b). **For PC:** Right click the STORMp3 icon in the left column of the opened file. A screen will appear with the option to "EJECT". Simply click that option to eject.
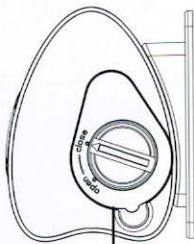

If you're having any trouble with this or any other steps, we have put together simple YouTube video instructions to help. Just visit **www.STORMp3.com** and click the "Video Instruction" icon. You can also always contact us as well at **Help@STORMp3.com**

Installing Batteries

Insert 4 AA batteries (#2) and replace the battery cover (#3).

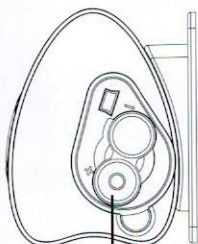

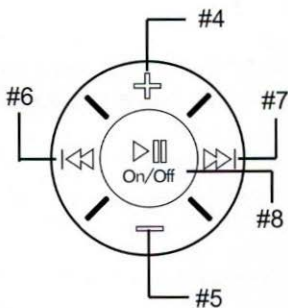

#2

#3

Make sure the battery cover is flush to the unit and locked, to ensure your STORMp3 is protected from water entering.

Playing Your Music

To listen to your music, press and hold the on/off button (#8) . The button will light up and your music will begin to play. To adjust the volume, use the + (#4) and − (#5). To change songs, press ← (#6) and → (#7).

Your music will play in shuffle mode giving you a random song each time. To pause your music, press and release the on/off button (#8). To restart your music, press and release the on/off button again (#8). To shut off your STORMp3, press and hold the on/off button (#8) until the light turns off.

Installing Your Wall Bracket

Make sure to clean and dry your wall before installing the bracket. Use all 3 pieces of double sided tape. Make sure to apply all the silicone provided. Spread the silicone all over the back of the bracket (there should be none left over). When you apply the bracket to the wall, give a firm press and hold for 5 seconds. This will ensure that the silicone was spread evenly and that the tape made good contact with the wall. Wipe away any silicone that may spread over the side of the bracket.
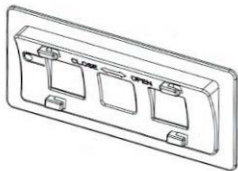

Front of Bracket
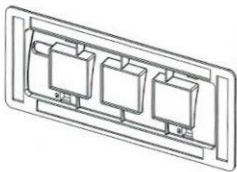

Back of Bracket

Allow the bracket set for 24 hours before attaching the STORMp3

Removing Songs and Resetting STORMp3

To remove songs from your STORMp3 using your computer, attach the same way you would to add songs with USB cable. Once connected to your computer, open the STORMp3 file and you will see the songs currently on your STORMp3. To remove individual songs:

PC users: locate the song(s) you want to delete and with your mouse, click that song once to highlight it. Now press delete on your keyboard and the song has been removed.

Mac users: locate the song(s) you want to delete and with your mouse, click and drag those files into your trash bin. You must now delete the file from your computers trash bin to complete the removal process from your STORMp3. If you do not clear the song from your trash bin, the song will still play on your STORMp3 even though you don't see the file when your connect STORMp3 to your computer.

Resetting your STORMp3 will remove all songs permanently. While the STORMp3 is playing music, using a toothpick or paperclip, press and hold the button on the back of the unit. After 3 seconds you will hear the STORMp3 go silent. Your STORMp3 file folder is now empty.

STORMp3 Warranty

ToiletTree Products provides 30 day, no risk, unconditional 100% Money –Back Guarantee. If you're not completely satisfied with your purchase, simply return it within 30 days with a dated proof of purchase and we will gladly refund your money, in full, no strings attached. ToiletTree Products warrants this product to be free from all defects for a period of 1 year from the date of original purchase. This warranty does not apply to normal wear or damage due to accident, abnormal use, misuse or neglect. Any defective item will be replaced, at no charge, upon the reasonable confirmation by ToiletTree of its defective condition, if returned with proof of purchase to an authorized ToiletTree dealer or directly to ToiletTree Products Replacement, 517 Route 9W North, Upper Nyack, NY 10960. Neither ToiletTree nor any authorized ToiletTree dealer shall be liable for consequential damages arising from this warranty, unless otherwise provided by law.

Care and Cleaning Tips

To prevent water spotting on your STORMp3, it's recommended to wipe down your unit with warm water after each use. DO NOT clean with any regular household cleaning products because this could damage the rubber finish

FCC Compliance Statement

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.

2. This device must accept any interference received, including interference that may cause undesired operation.
