Top features

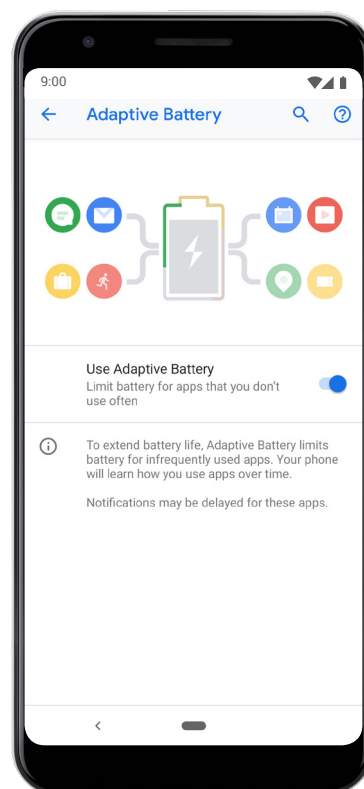

Camera

Pixel 3a’s extraordinary camera helps you capture better pictures with Night Sight and take flawless photos with Portrait Mode – all with unlimited storage at high quality³ – so you never have to worry about storing, finding or sharing your memories. And that’s only the beginning – with Playground and Photobooth, there are many more ways to create.

Demo idea

Try out Top Shot by taking an action shot. Scroll through the frames to see what other alternative moments have been captured and find your favorite.

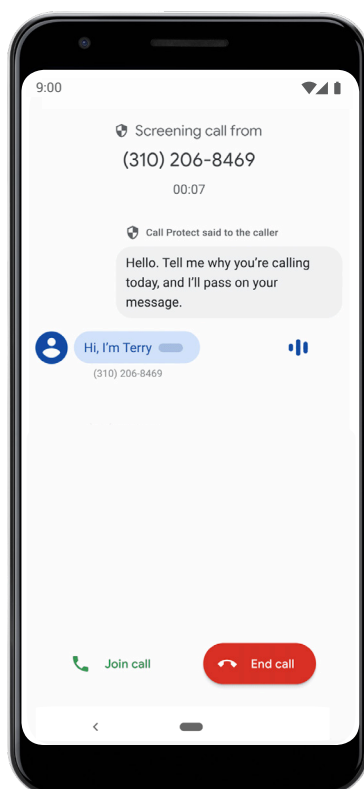

Adaptive Battery

Pixel 3a charges fast and lasts all day. Adaptive Battery uses Google’s software smarts to limit power to the apps and services you hardly use, and preserve it for the ones you use most often. Pixel 3a’s battery offers 7 hours of use on just a 15-minute charge, so rather than wondering where you’re going to charge-up next, you’re able to stay on task and keep your momentum all day long.⁴

Demo idea

Get to know a little more about the Pixel 3a Battery. Go to Settings, tap **Battery** and see the power status and usage stats.

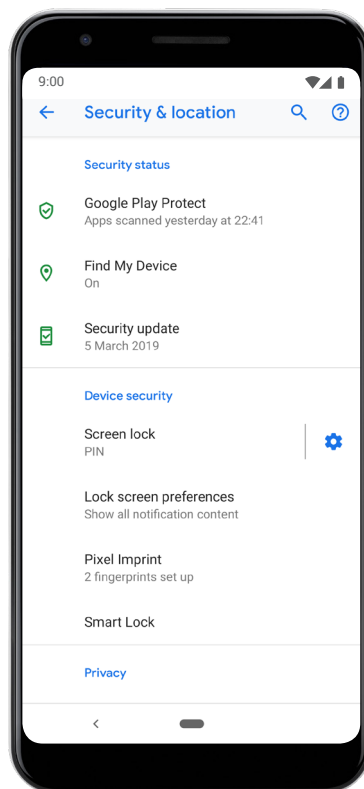

Google Assistant

The Google Assistant helps you send texts, get directions, screen calls, and so much more. It’s got your back, and your answers, and helps you get more done during your day.^{5,6} Just say “Hey Google” to get started. You can also quickly – and conveniently – activate your Google Assistant with a light squeeze of Pixel 3a’s sides.⁷

Demo idea

Ask a friend, colleague or family member to call your Pixel 3a device so you can screen their call, read their reason for calling and then answer the call.

Security

The latest Android 9.0 Pie OS and the custom-built Titan M chip help boost data protection with the safety and security only Google can provide.⁸ Plus, with Pixel 3a you get 3 years of OS and security updates to ensure you always have the most up-to-date OS and your phone is protected against the latest threats.⁹

Demo idea

Go to the Google Play Store, tap the burger menu, and then tap **Play Protect** to check out what apps have been recently scanned.

¹Storage specifications refer to capacity before formatting.

²Pixel 3a phones have painted surfaces which are chip resistant, but may chip if the phone is dropped. Purple-ish is not available in all regions.

³Google Photos offers free unlimited online storage for all photos and videos uploaded in high quality. Photos and videos uploaded in high quality may be compressed or resized. Requires Google Account. Data rates may apply. g.co/help/photostorage.

⁴Approximate battery life based on a mix of talk, data, standby, mobile hotspot and use of other features, with always on display off. An active display or data usage will decrease battery life. Charging rates are based on use of the included charger. Charging time performance statistics are approximate. Actual results may vary.

⁵US and Canada only. English only.

⁶Not all capabilities available in all areas.

⁷Requires internet connection.

⁸See g.co/pixel/security for additional security information.

⁹Android version updates for at least 3 years from when the device first became available on the Google Store. See g.co/pixel/updates for details.

Pixel 3a & Pixel 3a XL tech specs

New UI

Pixel 3a has the intuitive and intelligent Android Pie behind it's iconic exterior- and it's got a lot to offer. Here are just two ways that Android Pie can make your life run that little bit smoother:

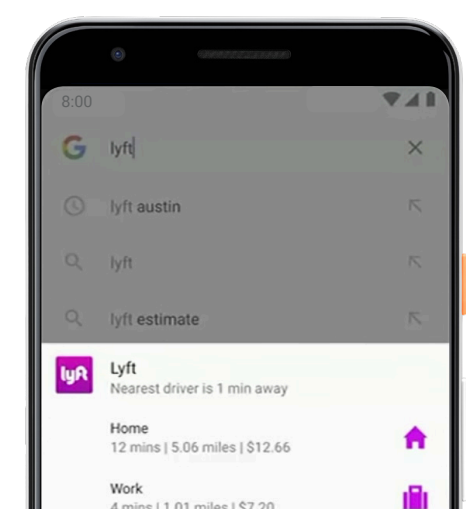

App Actions

Android Pie learns from its user's behavior, like which apps they use, when they use them and what they use them for. With this information it not only gets you from app A to app B faster, but also predicts what action you want to do in the next app.

💡 Demo idea

Swipe up from the home screen to access the apps menu in Overview, and see which App Actions are available.

Slices

Slices give users instant access to commonly used information and functions in apps, without having to open the app itself. You can get dynamic data and interactive controls, direct from your Google search bar. Making it quick and simple to do things like see the latest Lyft price or change your phone settings.

💡 Demo idea

Type the name of your favorite app in the Google search bar to see how a Slice of that app appears with related information. For example, type Lyft in to check the price of a ride.
