Top features

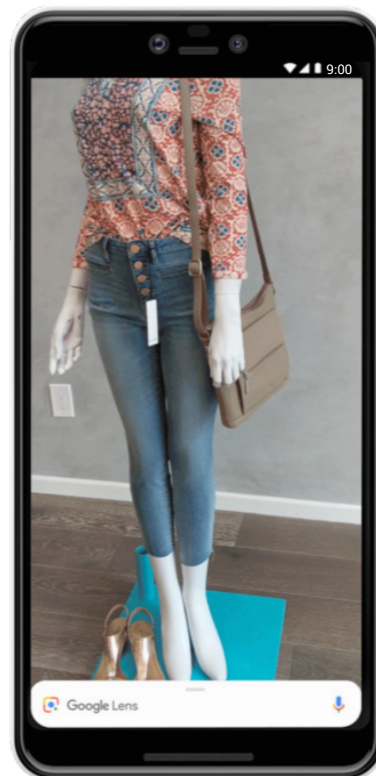

Camera

Get great group selfies without a selfie stick with Pixel 3's dual front-facing cameras. With Top Shot you'll get smiles, not blinks, for a great photo every time. Save all your favorite moments with free, unlimited photo storage on Google Photos.¹ And that's only the beginning - with Playground and Photobooth, there are many more ways to create.

Demo idea

Try out Top Shot by taking an action shot. Scroll through the frames to see what other alternative moments have been captured and find your favorite.

Google Lens

Search and discover more about the world around you with Google Lens. If you want to know where you can buy a pair of shoes you've seen or translate something from another language - all you need is your camera². Simply navigate to the Lens mode in your camera app and start exploring.

Demo idea

In Camera, tap More and activate Google Lens. Point your camera at items around you to see what you can learn.

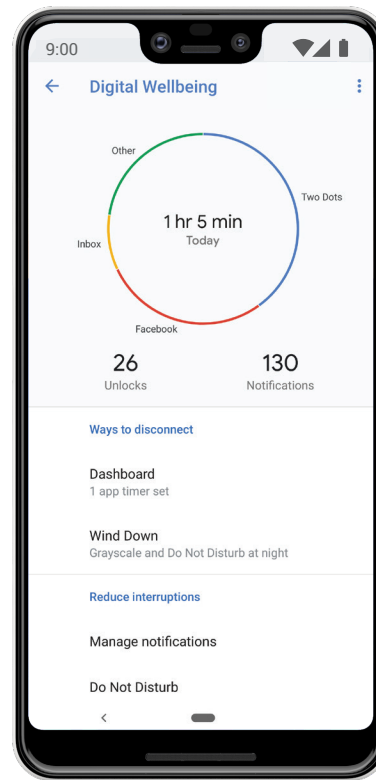

Call Screen

Know who is calling and why without having to pick up the phone. When you receive an incoming call, just select Screen Call and your Google Assistant will ask the caller who they are and their reason for calling. You can then decide to pick up or not.

Demo idea

Ask a friend, colleague or family member to call your Pixel 3 device so you can screen their call, read their reason for calling and then answer the call.

Digital Wellbeing

Flip your Pixel 3 facedown to go from Bzzz to Shhh- it'll automatically turn on Do Not Disturb mode and hide all your notifications so you can focus on what matters most. Keep track of your digital habits with your Digital Wellbeing dashboard. If you want, you can also limit the time you spend on certain apps using the app timer based on your dashboard stats.

Demo idea

Open Settings and tap Digital Wellbeing to access your dashboard. Look at how often you use apps, check your phone and receive notifications.

¹Free unlimited online original-quality storage for all photos and videos uploaded to Google Photos from Pixel 3 through 1/31/2022. Photos and videos uploaded before 1/31/2022 will remain free at original-quality. Requires Google Account. Data rates may apply. g.co/help/photostorage.

²For available Google Lens languages go to g.co/help/lens. Requires internet connection.

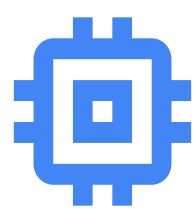

Pixel 3

Pixel 3 & Pixel 3 XL tech specs

Qi wireless charging

Pixel 3 has fast, wireless charging built in. Simply set it and forget it.

Titan M

Pixel 3's Titan M is a custom-made, built-in security chip that helps secure your most sensitive data, like passwords and operating system.

Adaptive Battery

Pixel 3's adaptive battery will keep you going longer by prioritizing battery power only for apps and services you care about.

New UI

Pixel 3 has the intuitive and intelligent Android Pie behind it's iconic exterior- and it's got a lot to offer. Here are just two ways that Android Pie can make your life run that little bit smoother:

App Actions

Android Pie learns from its user's behavior, like which apps they use, when they use them and what they use them for. With this information it not only gets you from app A to app B faster, but also predicts what action you want to do in the next app.

Demo idea

Swipe up from the home screen to access the apps menu in Overview, and see which App Actions are available.

Slices

Slices give users instant access to commonly used information and functions in apps, without having to open the app itself. You can get dynamic data and interactive controls, direct from your Google search bar. Making it quick and simple to do things like see the latest Lyft price or change your phone settings.

Demo idea

Type the name of your favorite app in the Google search bar to see how a Slice of that app appears with related information. For example, type Lyft in to check the price of a ride.
