# IT'S TIME FOR SUPERIOR COMFORT

by Acteon

<sup>Up to</sup>

CACTEON

of dentists and hygienists experience hand, wrist or arm pain. Dental practitioners ranked first in occupations affected by carpal tunnel syndrome (CTS)<sup>1</sup>.

## THE NEXT GENERATION OF MANUAL INSTRUMENTS

### PRECISE, HANDCRAFTED SHARPNESS WITH AN HEIR OF FRENCH CUTLERY

The working part of Bliss<sup>™</sup> curettes and scalers offer an optimal hardness for sharp instruments and excellent edge retention. To reach this level of excellence, ACTEON follows the cutlery traditions of Thiers, the world capital of fine cutlery. ACTEON has integrated the ancestral cutlery and metallic expertise to develop high quality manual instrumentation. ACTEON has reached the perfect balance between craftmanship, industrial techniques and technological innovation.

1 - "The effects of periodontal curette handle weight and diameter on arm pain". D.Rempel; D L.Lee; K.Dawson; P.Loomer. JADA 143(10) – October 2012

To find the perfect balance between the clinician's hand and the instrument, ACTEON used scientific studies based on dental instrument ergonomics. We also worked closely with clinicians to create a handle that makes treatments more comfortable, reliable and effective than ever before. With Bliss<sup>™</sup>, ACTEON exceeds expectations of dental professionals for the best treatment experience possible.

UNIQUE **BLISS GRIP** TECHNOLOGY

40% SHARPER THAN COMPETITORS

## PROVEN ERGONOMIC DESIGN AND COMFORT

# REVOLUTIONARY COMFORT AT YOUR FINGERTIPS

**(ACTEON** 

### SOFT & FIRM GRASP

Effective silicone grip surface
No spring effect, no slip surface

### BETTER ERGONOMICS

Handle with flat edges makes instruments easy to rollHigh tactile sensitivity

### 100% APPROVED By PRACTITIONERS<sup>2</sup>

### SUPERIOR COMFORT

"The large grip provides increased comfort, quick adaptation, easy rotation and reduced hand fatigue"

Karen VICHOS, RDH, USA

### REDUCTION OF HAND FATIGUE<sup>1</sup>

Optimum diameter of the handle for pinching force reduction<sup>1</sup>
Lightweight: 15g among the lightest instrument on the market

1 -The effects of periodontal instrument handle on hand muscle load and pinch force, D. Rempel; D. Lee; K. Dawson; P. Loomer; JADA 143 (10) - October 2012 2 - Internal field evaluation on 20 practitioners from 8 different countries. 100% answered that Bliss handle was confortable.

# EXCEPTIONAL PRECISION & QUALITY

## HIGH LEVEL OF EXPERTISE

- Manufactured in Thiers, France, the world capital of fine cutlery
- Premium, surgical grade stainless steel, the same used in cutlery having excellent hardness, wear and corrosion resistance

A NAVA B NAVA B

Hand-sharpened by well-trained artisan craftsmen

### ADVANCED HARDNESS AND STURDINESS

Advanced treatments applied for strength and longevity

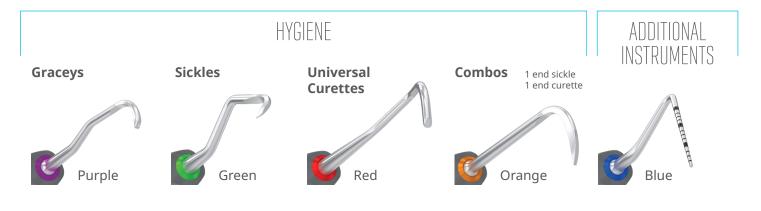

- Resistant to wear
- Lasting sharpness

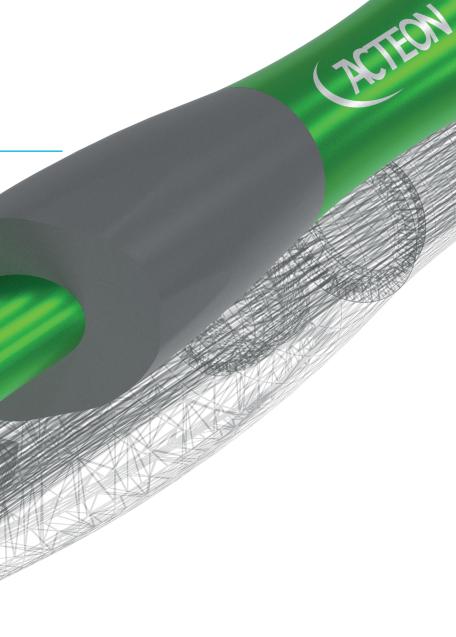

## ENHANCED COMFORT ACHIEVED

Extreme sharpness requires less force

- Less force means less muscle fatigue
- Less force means comfortable scaling

## SIMPLE COLOR CODING

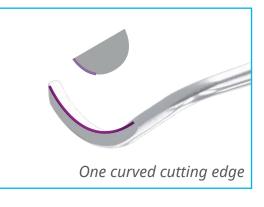

GRACEY CURETTES

# FEEL THE DIFFERENCE...

Based on the original standards of Gracey curette designs, ACTEON worked closely with dental hygienists to design the shanks and working ends of each instrument to maximize their performance and efficiency.

### Gracey 1-2 (Ref. 402.01SI) (ACTEON Gracey 5-6 (Ref. 402.05SI) (ACTEON Gracey 11-12 (Ref. 402.11SI) **(ACTEON** Gracey 13-14 (Ref. 402.13SI) (ACTEON Gracey 15-16 (Ref. 402.15SI) (ACTEON Gracey 17-18 (Ref. 402.17SI) (ACTEON

*Gracey 1-2: the curvature perfectly adapts to the anatomy of the anterior teeth* 

# ...FEEL THE COMFORT

Design and softness of the handle reduce hand fatigue and pinch force  $\ensuremath{^{(1)}}$ 

*Gracey 15-16: long shank is beneficial for posterior regions* 

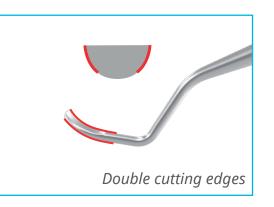

"I really liked the pentagonal, flat sided design of the grip. It was much more comfortable than typical cylindrical, machined grips. The instruments allowed superior tactile feedback which is crucial for precision surgery for me. Dental hygienists will also feel the difference with more comfort and reduced risk of muscle strain that could lead to other problems like carpal tunnel syndrome."

DR LEONID KATOLIK, MD, HAND SURGEON, USA

# UNIVERSAL CURETTES

# YOU DESERVE THE BEST COMFORT...

Bliss grip technology revolutionizes ergonomics.

*"I have been a practicing clinician for over 30 years. Using ACTEON scalers has made my job as a hygienist fun again."* 

RoseAnn GARNELLO, RDH, USA

Barnhart 5-6: Perfect angulation and working end for posteriors and mesial surfaces

# ...SO DO YOUR PATIENTS

Sharp blades for efficient and comfortable scaling.

Columbia 13-14: Optimal shank and working end

"The Bliss instruments from ACTEON are a dream come true. The wide silicone grip was comfortable and did not get slippery at all when they got wet. But the thing I was really impressed with was their sharpness. Their sharpness made scaling patients with tenacious calculus extremely easy without a lot of pressure"

CINDY STRAFACE, RDH, USA

# COMBOS

# ACCESS TO TIGHT INTERPROXIMAL SURFACES

Bliss sickle scalers are designed to deliver interproximal access for anterior and posterior teeth. The thinner terminal end of the blade increases access in hard to reach areas.

# ACTEON® MOUTH MIRRORS

Mouth mirrors are used for indirect vision in the oral cavity. The mounting is entirely in stainless steel. A silicone chip is put between the glass and the metallic mounting to make the mirror watertight.

## THE COATING

#### **BACK SURFACE**

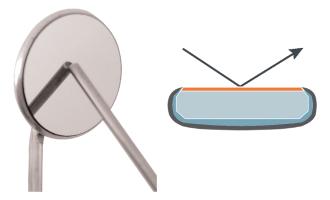

Coating: Aluminium

- Space between the object and the image because of the thickness of the glass
- Economical
- Less accurate because of the double image effect
- Blurry image because of double reflection

#### **FRONT SURFACE**

Coating: Pure Reflect®

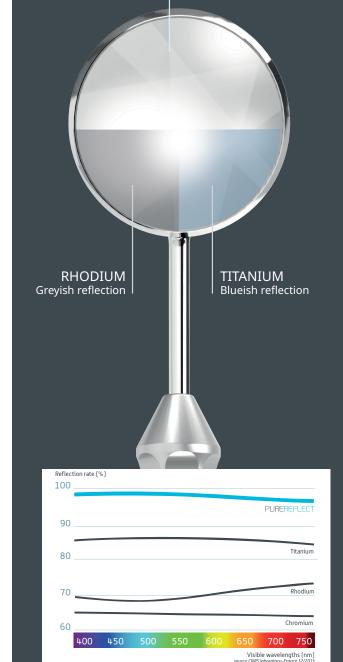

- No space between the object and the image. The reflective coating is deposited on the glass
- Clean and precise image
- Color alteration of TI and RH coatings
