plastic
materials

It sterilizes in
5 seconds

Easy to
prepare and
use

Safe for
professionals
and patients

IT PROTECTS ALL THE SURFACES, WHILE STERILIZING

DS34 has been specifically designed to protect surfaces, thanks to its innovative technology based on free radicals

- It does not break or ruin plastic parts of dental units or dental lights
- It does not erode surfaces
- It prevents oxidation
- It helps maintaining instruments in a proper way

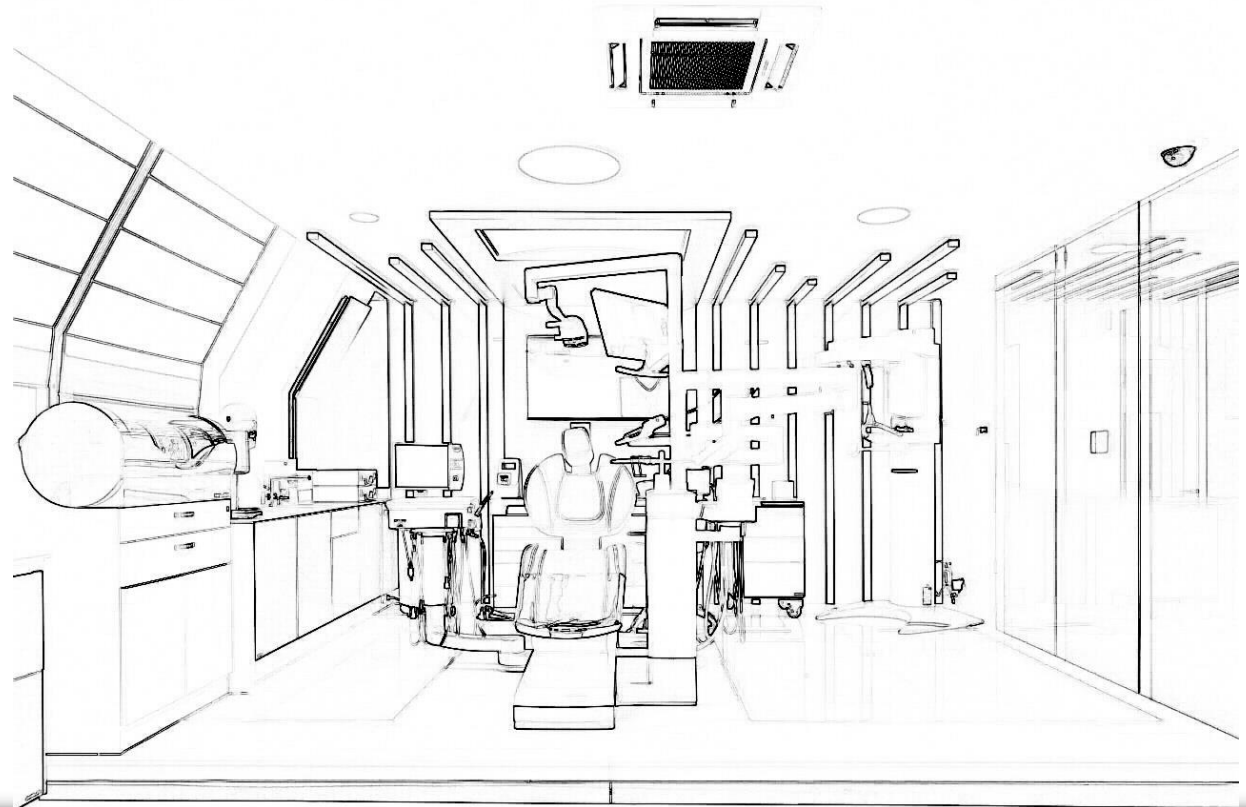

SURFACES PROTECTION

The sterilizing solution DS34 is the ideal product for every kind of instrument / surface / equipment

- Dental light
- Dental units
- Surgical chairs
- Trays
- Instruments
- Furniture
- Handles / keyboard
- Phones

One single sterilizing solution
for the whole dental practice

IT WORKS IN A FEW SECONDS

- It sterilizes **5 seconds**
- Its technology, based on free radicals, prevents pathogens' migration, eliminating the risks of contaminations.
- It sterilizes and simultaneously cleanses with a single treatment

More time for what really matters in your work

- DS34 reduces waiting times between patients, thanks to its rapid action
- The professionals can dedicate more time to procedures
- Fast activation of the solution to reduce cleaning times of surgical rooms

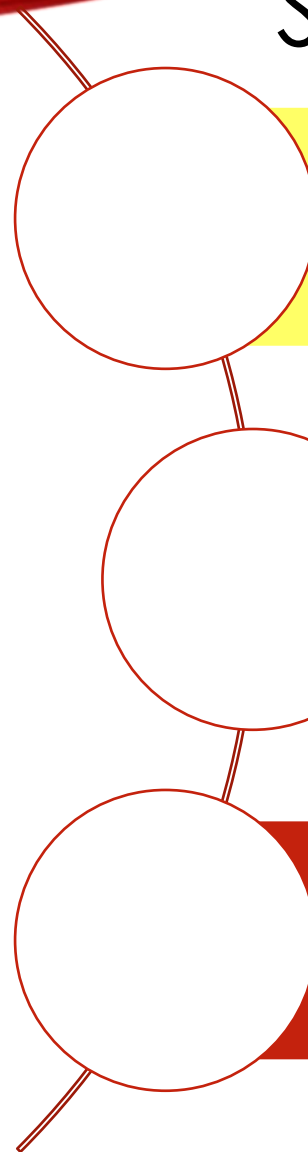

READY TO USE-
SAFE AND EFFECTIVE
