

Brain Teaser #5

Math Riddle - Starry Math

Below is a 5-pointed star with a regular pentagon superimposed in the center of the star. Given just one angle, can you find ALL the angles in this star?

Hint #1: a regular pentagon has congruent sides and angles.

Hint #2: two angles forming a straight line add to 180° .

Hint #3: the sum of the angles of a triangle add to 180° .
