## **Part 1 IMPORTANT SAFEGUARDS**

When using an electrical appliance, basic safety precautions should always be observed, including the following:

### **READ ALL INSTRUCTIONS BEFORE USING**

**WARNING: To reduce the risk of fire, electric shock, or injury to person:**

1. This fan is for household use only.
2. Before using for the first time, please check that your voltage is in accordance with the product's nameplate requirements.
3. Please check status of the power cord and plug before use for safety.
4. Always turn the fan OFF and unplug it from the electric outlet when it is not in use.
5. Caution is necessary when the appliance is used near children.
6. Do not run the power cord under carpets and do not cover the cord with throw rugs. Do not put cord under furniture or appliances. Arrange cord away from traffic areas so that people will not be tripped over by it.
7. Do not operate any fan with the damaged cord or plug. Discard the fan or return it to an authorized service facility for examination and repair.
8. If the fan's power supply cord is damaged, it must be replaced by the manufacturer or its service agent to avoid a safety hazard.
9. Use the fan in a well-ventilated area. Place the fan at least 8 inches from any walls to ensure the proper air flow during the usage. The fan cannot be located immediately below or close to the curtain.
10. Do not obstruct the airflow with any objects or place anything inside the fan opening.
11. Do not use the fan in areas where curtains could be sucked in.
12. Only place the fan on a hard, flat, dry floor.
13. Do not use under extreme temperatures, humidity, or dusty environments.

14. Do not put heavy objects on the fan.
15. Do not place the fan below the power outlet that will suck the cord inside to cause the damage.
16. When the fan is oscillating, do not manually touch the fan to avoid damage.
17. Always turn off the power supply before unplugging the power cord from the electric outlet to avoid a short circuit, fire or electric shock.
18. Do not twist or pull the power cord out.
19. Do not unplug the fan when your hands are wet, which might cause the danger of electric shock.
20. Children under 8 should not operate the fan.
21. This appliance is not intended for use by people (including children) with reduced physical/sensory/mental capabilities, or people who lack of experience and knowledge. Unless those ones mentioned above are under the supervision or guidance from people who are responsible for their safety.
22. Children should be supervised to ensure that they do not play with the appliance.
23. Ensure that the fan is switched off from the power supply before removing the guard.
24. To reduce the risk of fire or electric shock, do not use this fan with any solid-state speed control device.
25. Please unplug or disconnect the appliance from the power supply before the repair.
26. This product has overload protection (fuse). A blown fuse indicates an overload or short-circuit condition. If the fuse blows, unplug the product from the outlet. Replace the fuse following the user servicing instructions (Choose the appropriate fuse grade according to the product label) and check the product. If the replacement fuse blows, a short-circuit may be present and the product should be discarded or return to an authorized service facility for examination/repair.

**Warning:**

This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully into the electric receptacle, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to subvert this safety feature alone.

**To Change the fuse**

**The following should ONLY be conducted by a qualified professional person:**

1. Grasp plug and remove it from the electric receptacle. Do not unplug by pulling on the cord.
2. Open the fuse cover by sliding the fuse access cover on the top of the plug towards the blades as it is shown in the diagram below.
3. Remove the fuse carefully. Push the fuse from the other side or turn fuse holder upside down to remove fuse.

4. Risk of fire. Replace the fuse only with 5 Amp, 125 Volt fuse.
5. Close the fuse cover by sliding the fuse access cover on the top of the plug away from the blades.
6. Risk of fire. Do not replace the polarized plug as it has a safety device that should not be removed.

Discard product if its polarized plug is damaged.
