# How to install the driver of USB debugger on your computer

## Method 1

There is an executive file called ***ftdi_ft232_drive.exe***, you can install it by simply double clicking the file. Then the USB debugger will be automatically identified once plugged in the computer.

## Method 2

If method 1 doesn't work, you can install the driver by following instruments below:

(1) Plug in the USB debugger on your computer

(2) Go to **Control Panel** and open **Device Manager**.

(3) Right click the device and select **properties**.

(4) Select **Driver** tab, then click the **Update Drive**r button.

(5) Choose **Browse my computer for driver software**.

(6) **Let me pick from a list of device drivers on my computer**

(7) Browse for the **.inf** driver file. Open and Next.

(8) The driver will be installed.
