

INSTALLATION INSTRUCTIONS

STEP 1: Download and install the free <u>KONTAKT PLAYER</u> and <u>NATIVE ACCESS</u> applications from Native Instruments. If you already have Kontakt Player and Native Access installed, be sure to update them to the latest version before continuing with your installation.

STEP 2: Unzip your sample library and move the resulting folder to the location on your hard drive where you wish to keep your sample library.

PLEASE NOTE: It is very important to choose the location on your hard drive where you wish to keep your library BEFORE you activate it via NATIVE ACCESS. Moving a library after installation can result in errors.

STEP 3: Launch NATIVE ACCESS and click the "Add a serial" button

STEP 4: Add the serial number from your confirmation e-mail (if purchased online) or from the authorization card included in the box (if purchased in a retail store).
