

Nature-Cide®

RESORT & CLUBHOUSE GUIDE

Proven Effective 25(b) Minimum Risk Pesticide
Pleasant Aroma • Quick Knockdown • 100% Natural

We understand that all-natural green pest control is now vital for Resort, Hotel, and Golf Clubhouse customers to maintain a safe and healthy environment for patrons and staff members.

How Nature-Cide Works

Advancements in technology now allow us to provide quality pest control services for resort and clubhouse environments using the latest in chemistry blending of botanical oils that are approved by agricultural authorities in multiple states. The combination of botanical oils target & block octopamine which is an important neurotransmitter and hormone in insects. Most mammals do not possess these identical receptors; therefore, botanical oils have no adverse effect on people or animals. Nature-Cide products can be used in and around pool areas, and right up to shorelines of lakes, ponds & streams, thus understanding why agricultural departments in many states approve of 25(b) minimum risk pesticides like Nature-Cide.

What You Can Expect

Inspection

- Trained technicians will inspect your property to locate the source of any infestation as well as harborages conducive to future pest infestations.

Treatment Plan

- We will customize a treatment plan according to any pest pressure you may have.
- Our licensed service technicians will make recommendations, for IPM exclusion in all areas.
- We also will place monitors and or insect traps to act as alerts for any new pest occurrence. This is just one of the ways we help reduce the risk of a potential for a pest infestations.

Application

- Treatments are applied with the use of specialized power spraying equipment and our proprietary all-natural outdoor Nature-Cide products.
- You do not need to be present for these types of treatments, and once the treatment is completed, both patrons and staff members can return to the treated areas almost immediately without worrying about coming into contact with harsh synthetic insecticides.
- The botanical oils will kill insects on contact, repel insects and keep them out with monthly applications coupled with regular cleaning protocols. *Treatments are heightened with a stronger application to ward off rodents and reptiles.

Nature-Cide®

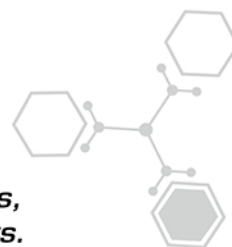

Features & Benefits

- *Made in the U.S.A.*
- *Granular can be applied while it's raining.*
