SS SERIES SOLAR LED STREETLIGHT - 20W

The SS Series LED solar streetlights are the ultimate in flexible standalone streetlighting. The battery and control gear is contained inside the light fitting with the solar panel separate. This allows for full panel orientation to maximise the charge from the sun. This way the light can operate to its full potential for longer periods of time, unlike many other solar streetlights on the market with built-in solar panels, which can dramatically limit the performance.

Features

- IP65 Weatherproof
- CREE LED Chips
- All aluminium and stainless steel fitting construction
- Adjustable horizontal or vertical spigot arm
- 3 days bad weather redundancy
- High quality LiFeP04 battery
- 3 preset control modes via remote (included)
- Motion sensor mode

Applications

- Carparks
- Walkways
- Estates
- Parks
- Showgrounds

Standard Specifications

- Rated Input Power: 20W
- Lumen Output: 2800lm
- CRI Rating: CRI >80
- Colour Temp: 5000K (4000K optional)
- Spigot Size: 65mm OD
- Battery: LifeP04 323WH
- Panel: 90W Monocrystalline
- Fitting Dimensions: 60*27*26cm
- Panel Dimensions: 76*67*4cm
- Weight: 28kgs (Fitting + Panel)
