Please read and understand all instructions before beginning the installation of the **JLFIREB** fire extinguisher bracket. Please read the terms and policies on the back of these instructions.

The **JLFIREB** fire extinguisher bracket is designed to fit the following Jeep® vehicles: 2018 to current JL Unlimited (4 door) Wranglers **only with a hardtop**. The bracket is designed to hold both 5-B:C, and 10-B:C fire extinguishers with an approximately 3-1/4" diameter barrel.

- STEP 1:** Carefully remove the plastic cover from the roll bar on the drivers side. (see figure1).
- STEP 2:** Mount Fire Extinguisher Bracket to roll bar using 8mm bolts and lock washers to the existing threaded holes in the roll bar. (see figure2)
- STEP 3:** Reinstall plastic cover removed during step 1. If you want to, you can trim plastic cover along the black line showed in figure 3 to make cover fit flush with the rest of the plastic. (see figure 3)
- STEP 4:** Loop bungee through holes and back through itself. For the shorter model fire extinguisher, use the bottom hole and the lower top hole. For the taller fire extinguisher, use the top hole.(see figure 4) If the bungees are loose, slide the ball down the cord and re-tie the knot to tighten the cord.

TERMS-POLICIES:

FIT and **TOLERANCES:** This skid plate is the result of countless hours of research, testing, fitting and refining. Jeep® frames have a wide tolerance on bolt hole centers from frame to frame. This is why M.O.R.E.™ has installed “slots” in which to mount them. In addition to the factory tolerances, most people install other than factory equipment such as suspension lift kits, bumpers, etc. M.O.R.E.™ has done the best job we can to insure that our parts fit with all of the possibilities. However, you may find it necessary to grind, elongate, bend, or force these parts to fit on your rig. Please use common sense when installing these parts and let us know how we can improve them.
