

PIÑATEX

DIGITAL CATALOGUE

WHAT IS PIÑATEX

Piñatex® is a **plant-based**, textile made from **pineapple leaf fibre**, which offers a **sustainable and vegan textile** that can be used across a wide range of applications within the footwear, accessories, apparel and interiors industries.

The pineapple leaf fibres used to create Piñatex are a **by-product of the agriculture industry**. No extra land, water or pesticides are required to produce the raw material.

Piñatex is a versatile, lightweight, breathable, water-resistant and durable material. Piñatex is continuously being developed to be suitable for further applications, including for use in the automotive industry in the near future.

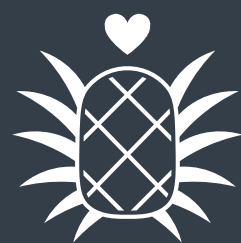

Piñatex is a product of our times, and a blueprint of the Ananas Anam vision.

95% RENEWABLE
Piñatex is made of up to 95% renewable resources.

NATURAL LOOK
Piñatex is shaped by nature and the fibres give its unique signature look.

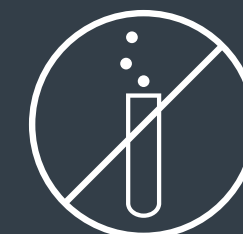

SUSTAINABLE
Piñatex is a natural, sustainably sourced, cruelty free material.

VEGAN
Plant based and PETA certified vegan material.

SCALABLE
27 million tonnes of pineapple leaf waste is produced annually.

FREE FROM CHEMICALS
Piñatex is REACH compliant, with no hazardous chemicals used in its production.

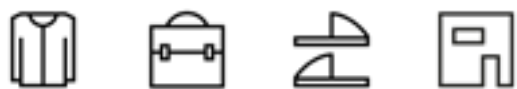

LESS WASTE
Fabric comes in rolls which reduces the material waste.

PIÑATEX COLLECTIONS

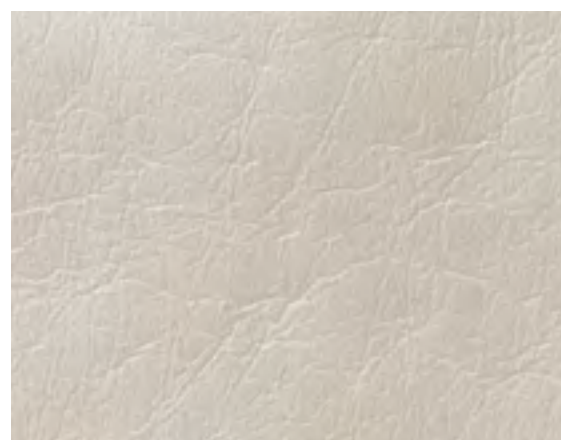

Piñatex® Original Collection

Piñatex Original is made of up to 95% renewable resources and offers a natural touch and feel, with a wrinkled surface that is instantly recognisable as Piñatex.

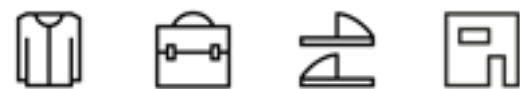

Recommended for use in:
Apparel, Accessories, Footwear and Interiors

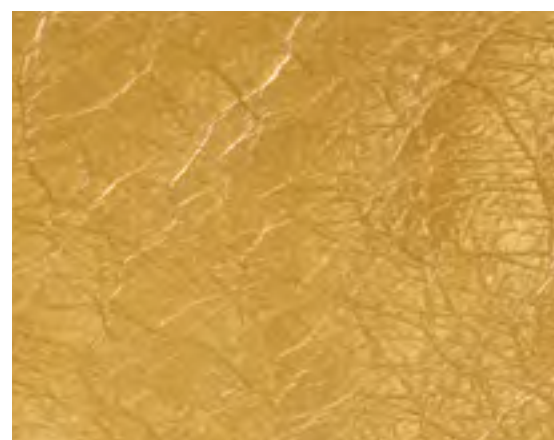

Piñatex® Mineral Collection

Piñatex Mineral is made of up to 95% renewable resources and has the same wrinkled texture as the Original collection. With a subtle shimmer, the Mineral Collection is perfect to elevate the look of any product.

Recommended for use in:
Apparel, Accessories, Footwear and Interiors

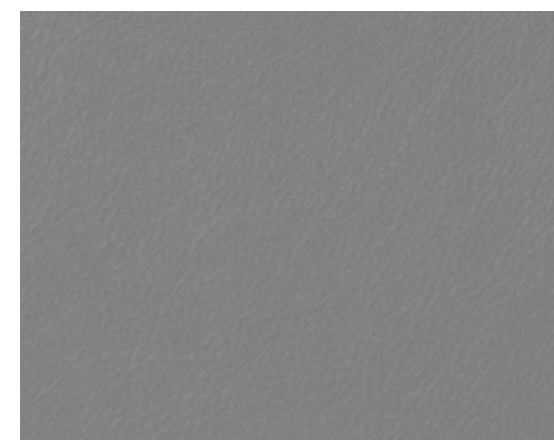

Piñatex® Metallic Collection

Piñatex Metallic has a bold and glossy finish, ideal for making a statement, with the wrinkled texture that Piñatex is well known for.

Recommended for use as
Details and Accents in: Apparel, Accessories and Footwear

Piñatex® Performance Collection

Piñatex Performance has a smooth, flat pebbled surface, similar to conventional alternatives to leather.

Recommended for use in:
Accessories, Footwear and Interiors (flat surfaces)

Piñatex® Light Collection

Piñatex Light is a coated textile with a backing knit from Piñayarn to achieve more drape and flexible characteristics. With a soft surface, Piñatex Light has an appearance similar to conventional alternatives to leather.

Recommended for use in:
Apparel, Accessories, Footwear and Interiors

This information is intended as a guide only, we recommend performing your own testing to ensure the material is suitable for your intended application.

PIÑATEX COMPOSITION

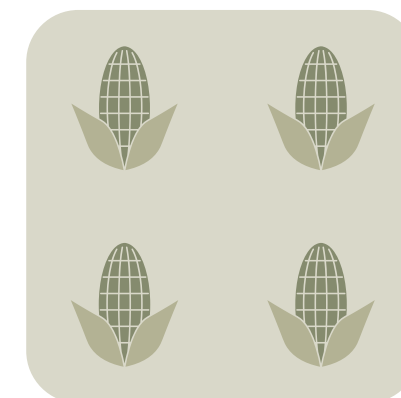

Our Piñatex® Original and Mineral Collections are composed from 95% bio-based and renewable resources.

Pineapple Plant

PALF, Pineapple Leaf Fibre 70%

Pineapple leaf fibre, or PALF, forms the greatest percentage of the textile Piñatex at 70% ($\pm 2\%$). The pineapple leaf fibre is extracted after the pineapple harvest from the long leaves of the pineapple plant, which would otherwise be discarded as waste and are often burnt.

PLA, Polylactic Acid 20%

Polylactic Acid, often referred to as PLA, comes from corn. The PLA is blended with the pineapple leaf fibres to form the backing of Piñatex.

Bio PU 5%

Polyurethane, or PU, forms the coating of Piñatex and is essential to provide properties like durability and water resistance. Up to 50% of the PU used in Piñatex is sourced from renewable resources.

PU 5%

PIÑATEX NON-WOVEN PRODUCTION STAGES

1. Pineapples are harvested

2. Waste leaves of the plant are collected

3. Fibres are extracted from the waste leaves

4. Residual biomass from the fibre extraction is used as fertilisers to re-plant the crops

5. Fibres are washed in water and dried in the sun

6. Fibres are purified and blended with poly(lactic acid) (PLA) from corn

7. 80% pineapple leaf fibres mixed with 20% PLA makes the non-woven base called Piñafelt®

8. The Piñafelt® is coloured with pigments and coated to make Piñatex®
