- Unit Price:\$1.53 P/Container (76,800 eaches)
- Unit SRP: \$4.99

**70% Alcohol**

**Description:** First Aid Antiseptic

## Isopropyl Alcohol 99%

Key features:

- Higher strength
- Will evaporate off the surface quickly
- Useful for cleaning applications

The higher percentages of Isopropyl Alcohol are used for cleaning purposes like disinfecting, window cleaning, stainless steel cleaner, killing bacteria, as well as many other uses. The higher the percentage, the greater the evaporation rate, meaning that it dries faster.

## Isopropyl Alcohol 91%

Key features:

- Higher strength
- Perfect for 99% Isopropyl formulations
- Great for cleaning

## Isopropyl Alcohol 70%

Key features:

- Higher moisture content
- Stays on surfaces longer, so it has time to kill bacteria
- Used as a rubbing alcohol for skin

The lower grade of Isopropyl Alcohol 70% means that it is not as harsh to the skin, but it is still effective.

**Description:** Keep your fingers and hands clean with these antibacterial sanitizing wipes.

**Features:** This wipe actively scrubs away bacteria to keep your skin - your body's protective barrier - free from infection-causing bacterial microbes.

- Kills 99.9% of Germ
- 15ct
- Active Ingredient - Benzalkonium Chloride 0.13% - Antimicrobial purpose

**Uses:**

- For hand sanitizing to decrease bacteria on the skin
- Recommended for repeated use

**Specifications:**

UPC: 10024291158292

**Description:** Nitrile is an allergy-safe compound that feels like latex with more durability and comfort. Nitrile is the material of choice for active use, like dishwashing, cleaning, and more. More resistant to most chemicals, oils, and solvents than latex and vinyl gloves.

## Features:

- Latex Free
- Disposable – Single use only
- Powder free
- One size fits most
- Made of nitrile material, good toughness, not easily broken
- Do not distinguish between left and right hand
- 3 pair (6ct total)
