

## EMBROIDERY

Using our embroidery processes your design is recreated as threads, and we match the colour of the thread as closely as possible to the colours in your original artwork. We can embroider designs with up to 8 colours. Included in the price is a digitised proof, which we will send across to you for approval before your order goes into production - so you can see how your design will look when embroidered.

## SCREEN PRINT

With our screen printing technique, a mesh screen is used to transfer ink onto your garments. Each colour is set up on its own screen that works like a stencil. Screen printing is the best way to get finer details and more vibrant colours, while boasting the best longevity.

## VINYL/DIGITAL PRINT

Digital printing is a fantastic option for printing onto cotton and polyester t-shirts and can deliver full colour printing onto both white and coloured shirts at the click of a button.

It is perfect for short runs, one off shirts and great for product sampling for larger runs, photo shoots, and complex designs. If your order is under 25 pieces it will most likely be digital or vinyl print.
