Hello,
Here's how to assemble your Hugo Monkey, just a few things to remember.

1. Insert LED bulb (SES/E14 LED SMALL SCREW LED CANDLE BULB)

2. Place shade with the narrow opening at the top and feed plug & wire through.

3. Carefully lift the monkey base and feed it through the shade, ensuring the narrow side is at the top. You may need to angle it a little.

4. The shade snuggly fits under Hugo's arms, right up into his armpits.

5. Finally, it's time to sit the bottom of the shade onto his left knee - it has a little shelf ready and waiting.

We'd love to see Hugo in his new home, feel free to share & tag @cotterellandco on Facebook or Instagram,
or send an email to: toria@cotterellandco.com
