

Dear Customer,

We would like to thank you for choosing one of our products and congratulate you on what we believe to be a wise choice. These fine products are hand-crafted in Brazil from certified lead free, non-toxic materials of the finest kind. If you follow the recommendations set out below, your dispenser will give you many years of drinking pleasure. Because of the evaporative properties of terracotta, the device will also cool your water and provide health benefits from using natural earthenware. You will be able to enjoy pure, cool, spring-fresh water at a very low cost for a long time to come.

LA NATURAL TERRACOTTA CARAFE

IMPORTANT INSTRUCTIONS FOR CARE AND MAINTENANCE

REMOVE ALL THE CONTENTS OF THE BOX

- 1 Terracotta carafe
- 1 Plastic lid and saucer

PREPARING FOR USE

Because the dispenser is made of terracotta earthenware, you can expect your water to taste “earthy”, initially. However, you can quickly get rid of the taste by simply soaking terracotta container in hottest water in kitchen sink, rotating occasionally. When water cools, repeat several more times. You can use the juice from a fresh squeezed lemon or a small amount of citric acid commonly found in the canning department of your local grocery store during the soak cycle. Although this seems like a lot of preparation, the taste of the water and the health benefits will be worth it. Your system is now ready for assembly.

NOTE

Sometimes a white residue appears on the outside of the dispenser. This is only dust particulates that are attracted to the damp terracotta; simply remove with soft cloth. You can use juice from a fresh lemon to assist in cleaning.

Never use any detergents of any kind with the Carafe.
