

## Laser Hair Removal

Laser treatments significantly reduce hair growth without damaging the surrounding skin. With several new laser systems available, we can now safely treat all skin types.

## Tattoo Removal

Our laser system can safely remove tattoos of all colors, shapes, and sizes.

## Tumescent Liposuction

This technique allows for a safe removal of fat without the need or risk of general anesthesia. Patients are pain-free and awake for the entire procedure. This procedure is the most preferred form of liposuction due to its immediate results and minimal down-time.

## Medical Grade Peels

Our peels treat fine lines, wrinkles, hyper-pigmentation, texture, acne and rosacea. We perform Salicylic acid, Glycolic acid, and Trichloroacetic acid peels.

## Esthetic Services

Enjoy a spa facial with medical results! Our certified medical estheticians perform all facial and waxing services. Our facials consist of a skin analysis, extractions, exfoliation, relaxing facial massage, and mask. Microdermabrasion and chemical peels can be added to the facial for greater results.

## Laser Peels

Laser peels are the most advanced method for improving skin texture. New technology allows for increased precision and depth of control, producing superior results. Fine lines, wrinkles and acne scars are dramatically improved.

### Glamour Laser Peel

Treats fine lines & wrinkles by removing a thin layer of skin. There is only mild redness with little down-time.

### Total Results Laser Facial

Combines two technologies to improve fine lines, wrinkles, and pigmentation irregularities such as red and dark spots. No pain and no down-time.

### A La Carte Laser Peel

Can target specific areas to treat lines and scars around the eyes, lips or on the cheeks without the down-time of a full face laser peel.

### Age-Defying Laser Peel

The most aggressive peel available for treating deep scars and wrinkles.

### Profractional Laser Resurfacing

Fractionated lasers can improve the skin texture to remove fine lines and wrinkles. The lasers also improve acne scars and other scars with less down-time than traditional laser resurfacing.

*Beautiful skin is your privilege...*

"As founder of the LINAGE Dermatology Institute and LINAGE skin care products, I am dedicated to the research and development of results-oriented products and services. My vision is to perfect cosmetic dermatology services and develop skin care products that can allow anyone to achieve and maintain a healthy, youthful complexion."

*- Dr. Michael T. Lin*

Dr. Michael Lin is a California-licensed physician and board-certified dermatologist. He is a Clinical Instructor at UCLA, Adjunct Professor of Clinical Medicine at USC, Diplomate of the American Academy of Dermatology and Fellow of the American Society of Mohs Surgery

## Free Cosmetic Consultation

A digital skin analysis system measures wrinkles, pores, and sun damage and generates computerized reports to help determine proper treatments. Expert clinical staff then evaluate and discuss your needs to help you reach your aesthetic goals.

## Lightening Program

Dr. Lin has developed a program using a combination of laser, chemical peels, and products to diminish unwanted dark spots. To ensure exceptional results, this signature program is tailored to the individual needs of each patient. 🌿 *Signature Program*

## Scar Solutions Program

Diminish surgical scars, traumatic scars and acne scars with the latest laser and surgical techniques developed by Dr. Michael Lin. This program will soften & flatten scars, lighten dyspigmentation and even out the texture of your skin. 🌿 *Signature Program*

## Eye Rejuvenation

Dr. Lin uses a combination of treatments to significantly diminish fine lines, dark circles, and fill in hollow areas under the eyes.

## Hand Rejuvenation

Rejuvenate your hands by re-volumizing, removing dark spots and minimizing fine lines.

## Skin Tightening

Brand new technology now allows us to firm and tighten sagging skin of the neck and lower face with minimal downtime and virtually no pain.

## Botox Injections

Botox is the number one non-surgical procedure in the U.S. It is one of the safest and most effective treatments for reducing the appearance of wrinkles and fine lines. Botox is used to relax and soften moderate to severe frown lines. Results last up to 6 months.

## Restylane • Radiesse • Juvederm

Dermal fillers are used to fill depressions, contour facial features, and define and enhance the appearance of lips. Fillers can also stimulate your skin to produce new collagen. Certain treatments last up to 24 months.

## Sculptra

Re-volumizing areas of volume loss by stimulating skin to produce your own collagen. The process occurs slowly over several months, but ultimately produces natural, long-lasting results.

## Photorejuvenation

Our photorejuvenation treatment combines three different lasers to treat sunspots, red spots, blotchiness, rosacea and spider veins. This procedure is more effective than the typical IPL or Photo Facial. In our Photorejuvenation Plus procedure, special medication is added to accentuate the results.

## Spider Vein Removal

Spider veins on the face and/or body can be removed effectively with sclerotherapy, laser, or a combination of both treatments.
