

Nouveau Super Unpleasant Companion

Congratulations on your purchase of a Fredric Effects Nouveau Super Unpleasant Companion effects pedal.

Controls

Switch 1: Toggles FY-2 Companion Fuzz mode or FY-6 Superfuzz mode.

Switch 2: Tone select. Up for the 'open' garagey sound, down for the scooped doomier sound.

Balance: Volume.

Expander:

- i) Superfuzz mode - Expander. This is a fuzz texture control. Turn it up and the fuzz is thicker and more complex. Turn it down and the fuzz is thinner with more pronounced ring mod sounds.
- ii) Companion Fuzz mode - Fuzztone. The subtle tone control of the FY-2. This goes from raspy to wooly.

Jacks

Input (from your guitar) on the right, output (to your amp) on the left.

Power

The effect is powered by 9V center-neg (Boss-type) jack, or standard 9V battery. When using battery power be sure to disconnect the input jack when not in use to prevent the battery draining.
