

# GETTING TO KNOW AND LOVE YOUR

## Revolve3.4<sup>®</sup> Surge Protector with 4 Rotating Outlets + 2 USB

360electrical.

360electrical.com | 

### POINTY HEADED STUFF

#### Thank you for buying a 360 Electrical Revolve3.4 Surge Protector.

We truly hope it gives you peace of mind with your electronics and the four rotating outlets relieve frustrations from fitting large plugs thus allowing more time for important stuff like writing your mother. Doesn't need to be long or poetic... maybe start with a text.

This handy little guide is designed to give basic information on how to use your Revolve3.4 Surge Protector as well as provide all the legal warranty-related stuff. The margins also provide plenty of space for grocery lists and online passwords.

**Help Us Help You—Register Now.** Logon the ol' interweb and head to our website to register your new Revolve3.4 Surge Protector. It'll initiate the rock star treatment you so richly deserve and get you advanced notice on new products from 360!

#### First, a few technical things that make our engineers pretty proud:

**Model #:** 36038  
**Electrical Ratings:** 15A, 120V, 60Hz, 1800W  
**USB Output:** Combined USB output is 3.4 Amps (17 Watts) which is enough to satisfy even the thirstiest of gadgets.

**Surge Energy Joule Rating:** 918 Joules (a joule is a measure of how much energy a surge protector can take before it bites the dust. We decided to make ours 918 because 917 was simply not enough).

**Response Time (the time it takes for the surge protector to kick in):** <1 Nanosecond

**Maximum Spike Current:** 36,000A

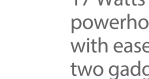

**UL Clamping Voltage:** 1200V (UL 1449, 3rd Edition)

**EMI/RFI Noise Filter:** 150kHz – 100MHz up to 40 Db

**How Your Revolve3.4 Protects:**  
*Inside your Revolve3.4 is a smart little guy called a metal oxide varistor (MOV). When the voltage coming out of the wall exceeds 120 volts (standard) it acts as kind of a relief valve diverting rogue voltage from your sensitive electronics.*

### CONSIDER YOURSELF WARNED!

#### Please follow these cautionary statements. If you don't, your Revolve3.4 might break, your warranty will be void, and you will be very unhappy with yourself.

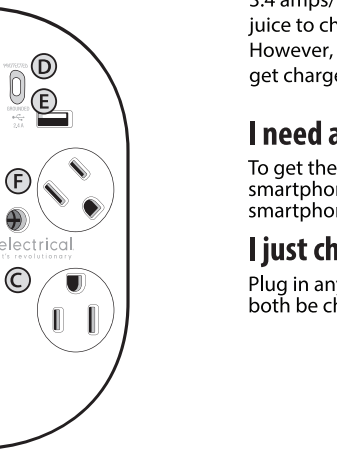

- ▶ Use indoors only and do not use near water. You listening, SCUBA guy?! 
- ▶ Do not plug any extension cord, power strip, wall tap, or multi-outlet adapter into your Revolve3.4.
- ▶ Don't plug your Revolve3.4 into anything but a grounded outlet (the kind with three holes in the socket).
- ▶ Do not plug things in that will exceed the electrical ratings (see "Pointy Headed Stuff").
- ▶ Don't use the Revolve3.4 with a heater, generator, convection oven, conventional oven, microwave, sump pump, water-related device, life support device, medical device, or vehicle battery charger.
- ▶ Quit using your Revolve3.4 if either indicator light is not on. (See "Revolve3.4 Anatomy" for more information.)
- ▶ If you're feeling all handy and want to alter or repair your Revolve3.4... Don't.

### REVOLVE3.4 ANATOMY

#### Read it. Know it. There will be a quiz.

- (A)** (4) 360° Rotating AC Outlets – We invented these for flexibility in dealing with giganto plugs. Just fully insert a plug and turn to fit.
- (B)** Dual USB Charging – Packing 3.4 Amps (that's 17 Watts for all you Apple users) this little powerhouse can charge all your electronics with ease. Feeling über efficient? Plug in two gadgets to charge at once.
- (C)** Advanced Surge Protection – Deep inside lies the defender of the connected devices you plug into the rotating outlets. It's there waiting to act on your behalf when evil transient voltage rears its ugly head.
- (D)** Blue "Protected" Light – This blue beacon of truth tells you everything's alright. If it goes out, your Revolve3.4 has absorbed a surge and sacrificed itself to save your electronics. Shed a tear, then replace it.
- (E)** Green "Grounded" Light – Lets you know the outlet you're plugged into is grounded. If this light doesn't come on, no bueno, use a different outlet.

**(F)** Center Mounting Screw – Yes, this is supposed to be here. Allows you to firmly anchor your Revolve3.4 in the wall socket. Have one of them fancy decorator outlets? Remain calm and simply remove the screw by holding the little red tab in place and use your favorite screwdriver real lefty-loosey like.

#### Share the love.

Did you know that almost all multi-port USB chargers share power from a single source? What does this mean? Think of it like a pipe with several faucets, the more faucets you turn on, the less water there is to flow through each faucet.

The USB ports on the Revolve3.4 share a total of 3.4 amps/17watts of power, which is plenty of juice to charge any combination of devices. However, for those times when you need to get charged extra fast, follow the outline below.

#### I need a charge and I need it now!

To get the fastest charge, plug in up to a smartphone and a tablet together, or two smartphones at the same time.

#### I just charge my stuff at night.

Plug in any combination of devices and they'll both be charged long before your alarm goes off.

#### USB CHARGING PORTS

1. First, remove the screw from the wallplate covering your wall outlet. Do not remove the wallplate but rather hold it in place. Dexterity level of one required here folks. Make it happen.

2. Align the plug from your Revolve3.4 with the top wall socket. Note: if your wall outlet is installed upside down or is installed horizontally just flip your Revolve3.4 to match.

3. Make sure the mounting screw on your Revolve3.4 is aligned with the hole in your wallplate and use a phillips head (named after inventor Henry F. Phillips) screwdriver to firmly secure the Revolve3.4 in place. NOTE: We know you're tough, but take 'er easy on the mounting screw. Over tightening = sadness. Now you can plug things in and out without worrying about pulling the Revolve3.4 out of the wall. Not to mention it's less likely to be stolen by your neighbor Larry.

4. "Oh no! My wall outlet doesn't look like that, what do I do with the mounting screw?!" If you have "decorator-style" wall outlets, props to you for your fashion sense. Use a phillips head (named after pop divas Wilson Phillips) screwdriver and just "Hold On" to that little red tab as you back the screw out. Now plug your Revolve3.4 in, effectively covering your fancy outlet.

5. Plug your devices into your Revolve3.4. To fit a bulky adapter, just plug into one of the 360° rotating outlets and turn to fit another. Go ahead, show it who's boss.

**UL STATEMENT**  
**CAUTION:**  
 a) To reduce the risk of electric shock – Disconnect power to the receptacle before installing or removing the unit. When removing receptacle cover screw, cover may fall across plug pins or receptacle may be dislodged;  
 b) Use only with duplex receptacle having center screw;  
 c) Secure unit in place with screw provided.

### QUICK SETUP

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### FCC STATEMENT

**LIMITED LIFETIME WARRANTY**  
 The Limited Lifetime Warranty of this product—360 Electrical Revolve3.4 Surge Protector with 4 Rotating Outlets + 2 USB Model #36038 is subject to all of the conditions and exclusions contained in the articles below. This Limited Lifetime Warranty gives you, the original purchaser, specific legal rights along with additional rights that apply in certain states. This Limited Lifetime Warranty applies only to the enclosed 360 Electrical model. 360 Electrical warrants to the verified original purchaser of this 360 Electrical Surge Protector for the life of this product that there will be no defects in craftsmanship, materials, assembly or design. Should there be any defects in any of the categories listed above 360 Electrical will, at its sole discretion, repair or replace the defective Surge Protector at no cost to the original purchaser. The life of the Surge Protector is defined as the period of time that the Surge Protector has the capacity to protect against power surges and spikes. The "Protected" indicator light will no longer illuminate when this capacity is exceeded.

**CONNECTED EQUIPMENT LIMITED WARRANTY**  
 360 Electrical's Connected Equipment Warranty covers only equipment that is damaged or destroyed by transient voltage while properly connected to a properly wired AC power line with protective ground. Transient voltage or a "Power Disruption" is defined as a brief voltage spike and/or surge on the AC power. 360 Electrical, at its option, will pay the present fair market value for the replacement or repair of the damaged connected equipment up to the maximum amount stated below:

**Item - 36038 | Up to a maximum of \$100,000.00**  
 This is a Limited Warranty and is subject to the conditions and provisions contained in the following articles. This warranty is null and void if any of the following conditions exist: (a) the equipment is not properly connected to the Surge Protector, (b) the Power Disruption damages your equipment through phone, network or coaxial lines, (c) the Surge Protector has been improperly opened or installed or has been tampered with, (d) the damage was not a result of a Power Disruption or a Power Disruption never took place, (e) or the Surge Protector was not used under normal operating conditions in accordance with the user instructions or the original purchaser does not make a claim within 15 days from the date of the Power Disruption with the purchase receipt for the Surge Protector and equipment for

**WARRANTY**  
 All claims must be made within 15 days of the Power Disruption and damage to the equipment. If claims are not made within 15 days of the Power Disruption, the claim is null and void.  
 If 360 Electrical determines that the Connected Equipment Limited Warranty covers the damaged equipment, and that the equipment was damaged as a result of the Surge Protector which is covered under the Limited Lifetime Warranty, 360 Electrical will either 1) authorize repair of the connected equipment, at a cost up to the maximum amount set forth on the packaging of the surge protector involved; 2) provide the consumer with an equivalent equipment replacement; or 3) reimburse the consumer for the present fair market value of the damaged connected equipment. The present fair market value of the equipment will be determined according to the current value specified in the most recent edition of the Orion Blue Book by Orion Research Corporation, Roger Rohrs - Publisher.  
**SEND CLAIMS TO:**  
 Attn: Claims Department | 360 Electrical, LLC  
 1935 East Vine Street, Suite 360  
 Salt Lake City, UT 84121  
 Or call 801-364-4900 for assistance in forwarding equipment, purchase receipts, 360 Electrical Surge Protector and how to proceed with the claim.

**HOW TO MAKE A CLAIM**  
 To make a claim, visit 360electrical.com and provide the required information or follow the steps below:  
 1) Mail the Surge Protector, at your expense, to the address at the bottom of the page  
 2) Provide the part number for the Surge Protector  
 3) Mail (if applicable), at your expense, the equipment that was connected to the Surge Protector  
 4) Explain in writing the extent of the damage that occurred to the connected equipment  
 5) Provide the date of the occurrence  
 6) Provide a copy of the original purchase receipt for the Surge Protector and damaged equipment  
 7) State when and where the purchases were made (if not clearly marked on the receipt)  
 8) Provide evidence of damage to connected equipment (pictures, the equipment itself, etc.)
