

YOUR Director3.4™ SURGE PROTECTOR

8 Outlets | 2 USB

POINTY HEADED STUFF

Thank you for buying a 360 Director3.4 Surge Protector.

We truly hope it gives you peace of mind with your electronics and the super techy USB charging relieves low battery stress thus allowing more emotional energy for important stuff like writing your mother. Doesn't need to be long or poetic... maybe start with a text.

This handy little guide is designed to give you basic information on how to use your Director3.4 Surge Protector as well as provide all the legal warranty-related stuff we all know and love. It's also a great origami starter kit.

Help Us Help You—Register Now.

Log on the ol' interweb and head to our website to register your new Director3.4 Surge Protector. It'll initiate the rock star treatment you so richly deserve and get you advanced notice on new products from 360!

CONSIDER YOURSELF WARNED!

First, a few technical things that make our engineers pretty proud:

Model #: 360543

Electrical Ratings: 15A, 120V, 60Hz, 1800W
USB Output: Combined USB output is 3.4 Amps (17 Watts) which is enough to satisfy even the thirstiest of gadgets.

Surge Energy Joule Rating: 3240 Joules (a joule is a measure of how much energy a surge protector can take before it bites the dust.)

Response Time (the time it takes for the surge protector to kick in): <1 Nanosecond

Maximum Spike Current: 180,000A

UL Clamping Voltage: 500V

EMI/RFI Noise Filter: 150kHz – 100MHz up to 40 Db

How Your Director3.4 Protects:
Inside your Director3.4 is a smart little guy called a metal oxide varistor (MOV). When the voltage coming out of the wall exceeds 120 volts (standard) it acts as kind of a relief valve diverting rogue voltage from your sensitive electronics.

DIRECTOR3.4 ANATOMY

Please follow these cautionary statements. If you don't, your Director3.4 might break, your warranty will be void, and you will be very unhappy with yourself.

- ▶ Use indoors only and do not use near water. You listening, SCUBA guy?! 
- ▶ Do not plug any extension cord, power strip, wall tap, or multi-outlet adapter into your Director3.4.
- ▶ Don't plug your Director3.4 into anything but a grounded outlet (the kind with three holes in the socket).
- ▶ Do not plug things in that will exceed the electrical ratings (see "Pointy Headed Stuff").
- ▶ Don't use the Director3.4 with a heater, generator, convection oven, conventional oven, microwave, sump pump, water-related device, life support device, medical device, or vehicle battery charger.
- ▶ Quit using your Director3.4 if either indicator light is not on. (See "Director3.4 Anatomy" for more information.)
- ▶ If you're feeling all handy and want to alter or repair your Director3.4... Don't.

USB CHARGING PORTS

Read it. Know it. There will be a quiz.

- (A)** (8) AC Outlets – Put your standard plugs in here and then, uh, they're plugged in. Keep your outlets closed when not in use with a simple slide of the safety cover.
- (B)** (3) Adapter-Spaced 90° AC Outlets – These guys fit giganto plugs.
- (C)** Dual USB Charging – Packing 3.4 Amps (that's 17 Watts for all you Apple users) this little powerhouse can charge all your electronics with ease. Feeling über efficient? Plug in two gadgets to charge at once.
- (D)** Advanced Surge Protection – Deep inside lies the defender of the connected devices you plug into the outlets. It's there waiting to act on your behalf when evil transient voltage rears its ugly head.
- (E)** Blue "Protected" Light – This blue beacon of truth tells you everything's alright. If it goes out, your Director3.4 has absorbed a surge and sacrificed itself to save your electronics. Shed a tear, then replace it.
- (F)** Green "Grounded" Light – Lets you know the outlet you're plugged into is grounded. If this light doesn't come on, no bueno, use a different outlet.
- (G)** Ethernet + Coaxial Cable Protection – Surges can come in through coax, ethernet, and phone lines too! Keep your head on a swivel and play some defense. Route your cables through here before plugging them into your devices.
- (H)** ON/OFF Switch – This versatile switch controls the power to all 8 AC outlets. Overloaded? Not likely, but no problem. Just "Reset" by switching off then back on again.
- (I)** 6' Cord – Flexible, shielded and jacketed length of 14 gauge awesomeness. Insert the plug-end into an outlet and it makes your Director3.4 work.

SUPER QUICK SETUP

Share the love.

Did you know that almost all multi-port USB chargers share power from a single source? What does this mean? Think of it like a pipe with several faucets, the more faucets you turn on, the less water there is to flow through each faucet.

The USB ports on the Director3.4 share a total of 3.4 amps/17watts of power, which is plenty of juice to charge any combination of devices. However, for those times when you need to get charged extra fast, follow the outline below.

I need a charge and I need it now!

To get the fastest charge, plug in up to two smartphones or one tablet at a time.

I just charge my stuff at night.

Plug in any combination of devices and they'll both be charged long before your alarm goes off.

FCC STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARRANTY

LIMITED LIFETIME WARRANTY

The Limited Lifetime Warranty of this product—360 Electrical Surge Protector Model #360543 is subject to all of the conditions and exclusions contained in the articles below. This Limited Lifetime Warranty gives you, the original purchaser, specific legal rights along with additional rights that apply in certain states. This Limited Lifetime Warranty applied only to the enclosed 360 Electrical model 360 Electrical warrants to the verified original purchaser of this 360 Electrical Surge Protector for the life of this product that there will be no defects in craftsmanship, materials, assembly or design. Should there be any defects in any of the categories listed above 360 Electrical will, at its sole discretion, repair or replace the defective Surge Protector at no cost to the original purchaser. The life of the Surge Protector is defined as the period of time that the Surge Protector has the capacity to protect against power surges and spikes. The "Protected" indicator light will no longer illuminate when this capacity is exceeded.

CONNECTED EQUIPMENT LIMITED WARRANTY

360 Electrical's Connected Equipment Warranty covers only equipment that is damaged or destroyed by transient voltage while properly connected to a properly wired AC power line with protective ground. Transient voltage or a "Power Disruption" is defined as a brief voltage spike and/or surge on the AC power. 360 Electrical, at its option, will pay the present fair market value for the replacement or repair of the damaged connected equipment up to the maximum amount stated below:

- Item - 360543 | Up to a maximum of \$300,000.00
- This is a Limited Warranty and is subject to the conditions and provisions contained in the following articles. This warranty is null and void if any of the following conditions exist: (a) the equipment is not properly connected to the Surge Protector, (b) the Power Disruption damages your equipment through phone, network or coaxial lines, (c) the Surge Protector has been improperly opened or installed or has been tampered with, (d) the damage was not a result of a Power Disruption or a Power Disruption never took place, (e) or the Surge Protector was not used under normal operating conditions in accordance with the user instructions or the original purchaser does not make a claim within 15 days from the date of the Power Disruption with the purchase receipt for the Surge Protector and equipment for

WARRANTY

which the claim is made. This Warranty does not protect against acts of God (flooding, erosion or earthquake), war, vandalism, theft, normal wear and tear from use, depletion, obsolescence, abuse, damage from from brownouts or sags or equipment alteration.

This Warranty is null and void if any person or facility not authorized by 360 Electrical not protect against, and 360 Electrical, LLC is free from liability, the incidental, indirect, direct or consequential monetary damages occurring from the sale or use of the Surge Protector such as loss of revenue, sales and/or profits.

This Warranty is limited to the losses not covered by the original purchaser's home owner's insurance or renter's insurance and the original purchaser cannot seek duplicate coverage under this Warranty. 360 reserves the right, at its sole discretion, to review and investigate all of the conditions and provisions listed above and determine whether any or all conditions exist making the claim null and void.

HOW TO MAKE A CLAIM

To make a claim, visit 360electrical.com and provide the required information or follow the steps below.

- 1) Mail the Surge Protector, at your expense, to the address at the bottom of the page
- 2) Provide the part number for the Surge Protector
- 3) Mail (if applicable), at your expense, the equipment that was connected to the Surge Protector
- 4) Explain in writing the extent of the damage that occurred to the connected equipment
- 5) Provide the date of the occurrence
- 6) Provide a copy of the original purchase receipt for the Surge Protector and damaged equipment
- 7) State when and where the purchases were made (if not clearly marked on the receipt)
- 8) Provide evidence of damage to connected equipment (pictures, the equipment itself, etc.)

CAN ICES-3 (B)/NMB-3(B)

SEND CLAIMS TO:

Attn: Claims Department | 360 Electrical, LLC
1935 East Vine Street, Suite 360
Salt Lake City, UT 84121

Or call 801-364-4900 for assistance in forwarding equipment, purchase receipts, 360 Electrical Surge Protector and how to proceed with the claim.

360

360

All claims must be made within 15 days of the Power Disruption and damage to the equipment. If claims are not made within 15 days of the Power Disruption, the claim is null and void.

If 360 Electrical determines that the Connected Equipment Limited Warranty covers the damaged equipment, and that the equipment was damaged as a result of the Surge Protector which is covered under the Limited Lifetime Warranty, 360 Electrical will either 1) authorize repair of the connected equipment, at a cost up to the maximum amount set forth on the packaging of the surge protector involved; 2) provide the consumer with an equivalent equipment replacement; or 3) reimburse the consumer for the present fair market value of the damaged connected equipment. The present fair market value of the equipment will be determined according to the current value specified in the most recent edition of the Orion Blue Book by Orion Research Corporation, Roger Rohrs - Publisher.
