

YOUR Visionary3.4™ SURGE PROTECTOR + USB

POINTY HEADED STUFF

Thank you for buying a 360 Electrical Visionary3.4 Surge Protector.

We truly hope it gives you peace of mind with your electronics and the super techy USB charging relieves low battery stress thus allowing more emotional energy for important stuff like writing your mother. Doesn't need to be long or poetic... maybe start with a text.

This handy little guide is designed to give you basic information on how to use your Visionary3.4 Surge Protector as well as provide all the legal warranty-related stuff we all know and love. It's also a great origami starter kit.

Help Us Help You-Register Now.

Log on the ol' interweb and head to our website to register your new Visionary3.4 Surge Protector. It'll initiate the rock star treatment you so richly deserve and get you advanced notice on new products from 360!

CONSIDER YOURSELF WARNED!

First, a few technical things that make our engineers pretty proud:

- Model #:** 360550
- Electrical Ratings:** 15A, 120V, 60Hz, 1800W
- USB Output:** Combined USB output is 3.4 Amps (17 Watts) which is enough to satisfy even the thirstiest of gadgets.
- Surge Energy Joule Rating:** 3240 Joules (a joule is a measure of how much energy a surge protector can take before it bites the dust.)
- Response Time:** < 1 Nanosecond (time it takes for the surge protector to kick in)
- Maximum Spike Current:** 180,000A
- UL Clamping Voltage:** 500V
- EMI/RFI Noise Filter:** 150kHz – 100MHz up to 40 Db

How Your Visionary3.4 Protects: Inside your Visionary3.4 is a smart little guy called a metal oxide varistor (MOV). When the voltage coming out of the wall exceeds 120 volts (standard) it acts as kind of a relief valve diverting rogue voltage from your sensitive electronics.

VISIONARY3.4 ANATOMY

Please follow these cautionary statements. If you don't, your Visionary3.4 might break, your warranty will be void, and you will be very unhappy with yourself.

- Use indoors only and do not use near water. You listening, SCUBA guy?!
- Do not plug any extension cord, power strip, wall tap, or multi-outlet adapter into your Visionary3.4.
- Don't plug your Visionary3.4 into anything but a grounded outlet (the kind with three holes in the socket).
- Do not plug things in that will exceed the electrical ratings (see "Pointy Headed Stuff").
- Don't use the Visionary3.4 with a heater, generator, convection oven, conventional oven, microwave, sump pump, water-related device, life support device, medical device, or vehicle battery charger.
- Quit using your Visionary3.4 if either indicator light is not on. (See "Visionary3.4 Anatomy" for more information.)
- If you're feeling all handy and want to alter or repair your Visionary3.4... Don't.

USB CHARGING PORTS

Read it. Know it. There will be a quiz.

- (8) AC Outlets** - Put your standard plugs in here and then, uh, they're plugged in. Keep your outlets closed when not in use with a simple slide of the safety cover.
- (3) Adapter-Spaced AC Outlets** - These guys fit giganto plugs.
- Dual USB Charging** - Packing 3.4 Amps (that's 17 Watts for all you Apple users) this little powerhouse can charge all your electronics with ease. Feeling über efficient? Plug in two gadgets to charge at once.
- Advanced Surge Protection** - Deep inside lies the defender of the connected devices you plug into the outlets. It's there waiting to act on your behalf when evil transient voltage rears its ugly head.
- Blue "Protected" Light** - This blue beacon of truth tells you everything's alright. If it goes out, your Visionary3.4 has absorbed a surge and sacrificed itself to save your electronics. Shed a tear, then replace it.

SUPER QUICK SETUP

Share the love.

Did you know that almost all multi-port USB chargers share power from a single source? What does this mean? Think of it like a pipe with several faucets, the more faucets you turn on, the less water there is to flow through each faucet.

The USB ports on the Visionary3.4 share a total of 3.4 amps/17watts of power, which is plenty of juice to charge any combination of devices. However, for those times when you need to get charged extra fast, follow the outline below.

I need a charge and I need it now!

To get the fastest charge, plug in up to a tablet and a smartphone together or two smartphones at the same time.

I just charge my stuff at night.

Plug in any combination of devices and they'll both be charged long before your alarm goes off.

FCG STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARRANTY

LIMITED LIFETIME WARRANTY

The Limited Lifetime Warranty of this product—360 Electrical Surge Protector Model #360550 is subject to all of the conditions and exclusions contained in the articles below. This Limited Lifetime Warranty gives you, the original purchaser, specific legal rights along with additional rights that apply in certain states. This Limited Lifetime Warranty applied only to the enclosed 360 Electrical model. 360 Electrical warrants to the verified original purchaser of this 360 Electrical Surge Protector for the life of this product that there will be no defects in craftsmanship, materials, assembly or design. Should there be any defects in any of the categories listed above 360 Electrical will, at its sole discretion, repair or replace the defective Surge Protector at no cost to the original purchaser. The life of the Surge Protector is defined as the period of time that the Surge Protector has the capacity to protect against power surges and spikes. The "Protected" indicator light will no longer illuminate when this capacity is exceeded.

CONNECTED EQUIPMENT LIMITED WARRANTY

360 Electrical's Connected Equipment Warranty covers only equipment that is damaged or destroyed by transient voltage while properly connected to a properly wired AC power line with protective ground. Transient voltage or a "Power Disruption" is defined as a brief voltage spike and/or surge on the AC power. 360 Electrical, at its option, will pay the present fair market value for the replacement or repair of the damaged connected equipment up to the maximum amount stated below:

Item - 360550 | Up to a maximum of \$300,000.00

This is a Limited Warranty and is subject to the conditions and provisions contained in the following articles. This warranty is null and void if any of the following conditions exist: (a) the equipment is not properly connected to the Surge Protector, (b) the Power Disruption damages your equipment through phone, network or coaxial lines, (c) the Surge Protector has been improperly opened or installed or has been tampered with, (d) the damage was not a result of a Power Disruption or a Power Disruption never took place, (e) or the Surge Protector was not used under normal operating conditions in accordance with the user instructions or the original purchaser does not make a claim within 15 days from the date of the Power Disruption with the purchase receipt for the Surge Protector and equipment for which the claim is made. This Warranty does not protect against acts of God
