

YOUR SideLine™ SURGE PROTECTOR 6 Outlets

360electrical.com

Thank you for buying a 360 SideLine Surge Protector with 6 Side-Facing Outlets for Saving Space

We truly hope it gives you peace of mind with your electronics and the six side-facing outlets relieve frustrations from fitting into tight spaces, thus freeing up mental energy for important stuff like writing your mother. Doesn't need to be long or poetic... maybe start with a text.

This handy little guide is designed to give basic information on how to use your SideLine Surge Protector as well as provide all the legal warranty-related stuff. The margins also provide plenty of space for grocery lists and online passwords.

Help Us Help You—Register Now.

Log on the ol' interweb and head to our website to register your new SideLine Surge Protector. It'll initiate the rock star treatment you so richly deserve and get you advanced notice on new products from 360!

POINTY HEADED STUFF

First, a few technical things that make our engineers pretty proud:

Model #: 360554

Electrical Ratings: 15A, 120V, 60Hz, 1800W

Surge Energy Joule Rating: 1080 Joules (a joule is a measure of how much energy a surge protector can take before it bites the dust).

Response Time (the time it takes for the surge protector to kick in): <1 Nanosecond

Maximum Spike Current: 72,000A

UL Clamping Voltage: 500V

EMI/RFI Noise Filter: 150kHz – 100MHz up to 40 Db

How Your SideLine Protects:

Inside your SideLine is a handy little guy called a metal oxide varistor (MOV). When the voltage coming out of the wall exceeds 120 volts (standard) it acts as kind of a relief valve diverting rogue voltage from your sensitive electronics.

CONSIDER YOURSELF WARNED!

Please follow these cautionary statements. If you don't, your SideLine might break, your warranty will be void, and you will be very unhappy with yourself.

▶ Use indoors only and do not use near water. You listening, SCUBA guy?!

▶ Do not plug any extension cord, power strip, wall tap, or adapter into your SideLine.

▶ Don't plug your SideLine into anything but a grounded outlet (the kind with three holes in the socket).

▶ Do not plug things in that will exceed the electrical ratings (see "Pointy Headed Stuff").

▶ Don't use the SideLine with a heater, generator, convection oven, conventional oven, microwave, sump pump, water-related device, life support device, medical device, or vehicle battery charger.

▶ Quit using your SideLine if protected light is not on. (See "SideLine Anatomy" for more information.)

▶ If you're feeling all handy and want to alter or repair your SideLine... Don't.

SIDELINE ANATOMY

Read it. Know it. There will be a quiz.

(A) (6) Side-Facing AC Outlets – We created these for better access in tight spaces. Just fully insert your plugs and enjoy the added space.

(B) Advanced Surge Protection – Deep inside lies the defender of the connected devices you plug into the outlets. It's there waiting to act on your behalf when evil transient voltage rears its ugly head.

(C) Blue "protected" Light – This blue beacon of truth tells you everything's alright. If it goes out, your SideLine has absorbed a surge and sacrificed itself to save your electronics. Shed a tear, then replace it.

(D) Green "grounded" Light – Lets you know the outlet you're plugged into is grounded. If this light doesn't come on, no bueno, use a different outlet.

CAUTION – To reduce the risk of fire or electric shock, do not use this device with a receptacle in which the slot openings do not align with the blades. Not for use with ground-fault circuit-interrupter receptacles or receptacles with indicator lights or controls. This device features an internal protection that will disconnect the surge protective component at the end of its useful life but will maintain power to the load – now unprotected. If this situation is undesirable for the application, follow the manufacturer's instructions for replacing the device

SUPER QUICK SETUP

1. Plug your devices into your SideLine from, ahem, the side. To fit a bulky plug, use the bottom outlets to save even more space. Go ahead, show it who's boss.

2. Plug your SideLine into a grounded wall outlet.

3. Stand in complete awe at how much larger your room is now that your furniture is pushed closer to the wall than ever before.

WARRANTY

LIMITED LIFETIME WARRANTY

The Limited Lifetime Warranty of this product—360 SideLine, Model #360554 is subject to all of the conditions and exclusions contained in the articles below. This Limited Lifetime Warranty gives you, the original purchaser, specific legal rights along with additional rights that apply in certain states. This Limited Lifetime Warranty applied only to the enclosed 360 Electrical model. 360 Electrical warrants to the verified original purchaser of this 360 Electrical Surge Protector for the life of this product that there will be no defects in craftsmanship, materials, assembly or design. Should there be any defects in any of the categories listed above 360 Electrical will, at its sole discretion, repair or replace the defective Surge Protector at no cost to the original purchaser. The life of the Surge Protector is defined as the period of time that the Surge Protector has the capacity to protect against power surges and spikes. The "Protected" indicator light will no longer illuminate when this capacity is exceeded.

CONNECTED EQUIPMENT LIMITED WARRANTY

360 Electrical's Connected Equipment Warranty covers only equipment that is damaged or destroyed by transient voltage while properly connected to a properly wired AC power line with protective ground. Transient voltage or a "Power Disruption" is defined as a brief voltage spike and/or surge on the AC power. 360 Electrical, at its option, will pay the present fair market value for the replacement or repair of the damaged connected equipment up to the maximum amount stated below.

Item - 360554 | Up to a maximum of \$100,000.00

This is a Limited Warranty and is subject to the conditions and provisions contained in the following articles. This warranty is null and void if any of the following conditions exist: (a) the equipment is not properly connected to the Surge Protector, (b) the Power Disruption damages your equipment through phone, network or coaxial lines, (c) the Surge Protector has been improperly opened or installed or has been tampered with, (d) the damage was not a result of a Power Disruption or a Power Disruption never took place, (e) or the Surge Protector was not used under normal operating conditions in accordance with the user instructions or the original purchaser does not make a claim within 15 days from the date of the Power Disruption with the purchase receipt for

the Surge Protector and equipment for which the claim is made. This Warranty does not protect against acts of God (flooding, erosion or earthquake), war, vandalism, theft, normal wear and tear from use, depletion, obsolescence, abuse, damage from brownouts or sags or equipment alteration.

This Warranty is null and void if any person or facility not authorized by 360 Electrical makes any alteration, modification or repair to the surge protector. This warranty does not protect against, and 360 Electrical, LLC is free from liability, the incidental, indirect, direct or consequential monetary damages occurring from the sale or use of the Surge Protector such as loss of revenue, sales and/or profits.

This Warranty is limited to the losses not covered by the original purchaser's home owner's insurance or renter's insurance and the original purchaser cannot seek duplicate coverage under this Warranty. 360 reserves the right, at its sole discretion, to review and investigate all of the conditions and provisions listed above and determine whether any or all conditions exist making the claim null and void.

HOW TO MAKE A CLAIM

To make a claim, visit 360electrical.com and provide the required information or follow the steps below.

- 1) Mail the Surge Protector, at your expense, to the address at the bottom of the page
- 2) Provide the part number for the Surge Protector
- 3) Mail (if applicable), at your expense, the equipment that was connected to the Surge Protector
- 4) Explain in writing the extent of the damage that occurred to the connected equipment
- 5) Provide the date of the occurrence
- 6) Provide a copy of the original purchase receipt for the Surge Protector and damaged equipment
- 7) State when and where the purchases were made (if not clearly marked on the receipt)
- 8) Provide evidence of damage to connected equipment (pictures, the equipment itself, etc.)

All claims must be made within 15 days of the Power Disruption and damage to the equipment. If claims are not made within 15 days of the Power Disruption, the claim is null and void.

If 360 Electrical determines that the Connected Equipment Limited Warranty covers the damaged equipment, and that the equipment was damaged as a result of the Surge Protector which is covered under the Limited Lifetime Warranty, 360 Electrical will either 1) authorize repair of the connected equipment, at a cost up to the maximum amount set forth on the packaging of the surge protector involved; 2) provide the consumer with an equivalent equipment replacement; or 3) reimburse the consumer for the present fair market value of the damaged connected equipment. The present fair market value of the equipment will be determined according to the current value specified in the most recent edition of the Orion Blue Book by Orion Research Corporation, Roger Rohrs - Publisher.
