INSTRUCTIONS

1. Locate Rear A on back of Camera Body and Locking Area on front of Quick Back.

2. Align, insert, and gently push down until Locking Arms snap into place.

3. With Quick Back attached to Camera Body rotate Thumb Wheels to tighten onto Camera Body.

4. Find appropriate screws and threaded holes by using the Screw Chart. Insert and tighten into corresponding hole as shown on Hole Diagram.

NOTE: Shim stickers can be added to Quick Back above Attachment Hole if necessary.

IMPORTANT

Thumb Wheels can only be attached to camera brain.
