△ FOR ALL ELEMENTS

Introducing the DS18 SLG-SP6LD, a car audio masterpiece meticulously designed for the discerning enthusiast who demands nothing less than automotive sonic excellence. Tailored exclusively for Polaris Slingshots (2015-2019), these speaker pods redefine your audio experience with their sleek design and unwavering performance, all while conquering the elements to ensure your music remains powerful and reliable throughout your journey.

These pods feature a sleek design and are built to withstand the elements, thanks to their durable waterproof enclosure with UV protection. Inside, the SLG-SP6LD boasts OFC tinned wiring for enhanced power handling and reliability on your journey.

At the heart of this audio setup is the 6.5" PRO-SM6.2 Water Resistant Cone Midrange Speaker, offering an impressive RMS Power Handling of 200W and a MAX Power Handling of 400W, ensuring exceptional sonic performance with a sensitivity of 95dB for vividly reproducing even subtle musical nuances. To complete the high-fidelity experience, the kit includes a 1.7" ZXI-T1 PEI Dome Tweeter with a frequency range from 1KHz to 20KHz, finely tuned to complement the midrange speaker, delivering music as the artist intended it to be heard.

POLINES SINES INTERIOR KICK PANEL POOS

DS18's SLG-FKP6LD offers Slingshot enthusiasts an exciting audio enhancement by allowing the installation of speakers in the front kick panel areas of both the driver and passenger sides. Born from a vision to elevate the driving experience for Slingshot owners worldwide, the SLG Series seamlessly combines aesthetics, engineering, and cutting-edge technology to deliver an unparalleled audio experience within the Slingshot.

Each SLG-FKP6LD kit includes a pair of robust Polyethylene Front Kick Panel Pods, each equipped with a 6.5" Waterproof Speaker (the NXL-6BK) and a powerful 3.8" super bullet tweeter featuring RGB LED lights (the PRO-TW1L). The NXL-6BK is a waterproof 2-way speaker that delivers impressive full-range sound quality without compromising on space or worrying about moisture or environmental damage. Meanwhile, the PRO-TW1L, despite its compact size, is an extremely potent and versatile Super Bullet Tweeter, ensuring a significant audio impact.

Installation of these pods seamlessly integrates into your Slingshot's sound system using the factory bolts and mounting locations, providing a convenient and impressive audio upgrade for your driving pleasure.

Subwoofers Included

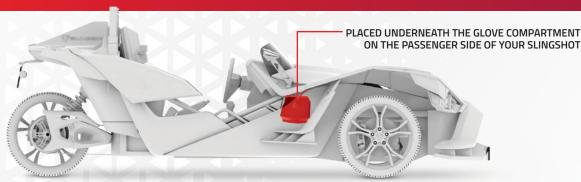

SLG-UDSD6

Experience a seismic upgrade in your Polaris Slingshot's audio system with DS18's effortless solution, the SLG-UDSD6LD. Recognizing the need for top-tier sound quality in Polaris Slingshots, DS18's expert team crafted the SLG series to deliver just that.

The SLG-UDSD6LD packs a punch with its dual ZR6.4D subwoofers, boasting 1.5-inch voice coils that handle 300W RMS and 600W MAX power. These subwoofers feature a large foam surround and pressed paper cone, working in perfect harmony to produce smooth, crisp bass that resonates throughout your vehicle. Engineered to handle intense power, they ensure clean and distortion-free bass, letting you feel every beat deep within your bones.

With an internal volume of 0.3ft3 and equipped with damping material, the SLG-UDSD6LD pushes the ZR6.4D subwoofers beyond their limits. Specifically designed for 2015-2019 Polaris Slingshot models, when combined with other enclosures from our SLG series, the SLG-UDSD6LD creates an impenetrable soundstage that effortlessly cuts through the noise of the open road, delivering an audio experience like no other.

POLARIS SLINGSHOT REAR . STORAGE COMPARTMENT

Elevate your Polaris Slingshot's audio experience with DS18's SLG-RSUB10LD. This durable 10" Subwoofer Enclosure instantly enhances your bass response, delivering head-banging quality that transforms your ride.

The SLG Series was born from a desire to revolutionize the audio experience for Slingshot owners worldwide. Recognizing the limitations of typical setups, our expert team designed the SLG-RSUB10LD to fit seamlessly into the rear storage compartments of all Polaris Slingshot models. When combined with other SLG series enclosures, it creates an impenetrable soundstage that cuts through the noise of the open road.

The high-powered NXL-10SUB, with its IP65 marine-grade frame, is built to deliver hard-hitting, booming bass that can withstand the elements, whether you're off-roading, boating, or cruising in your Slingshot. Its UV-compliant cone and butyl rubber surround ensure stability, making it a perfect match for the open-air design of the Slingshot. Upgrade your audio and feel the rhythm like never before with DS18.
