

Our reclaimed ocean plastic:

- Our 100% reclaimed ocean plastic is Oceanworks® Guaranteed, HDPE, and a #2 recyclable.
- Our products are proudly Made in the USA and we source our reclaimed ocean plastic in partnership with [Oceanworks](#), a global marketplace for reclaimed ocean materials and products.
- Oceanworks provides the verification that we're sourcing pure materials.

Do's and don'ts:

- **DO** use the terms **100% reclaimed ocean plastic** and **Oceanworks® Guaranteed**.
- **DO NOT** use the term **100% recycled ocean plastic**.

Product disposal:

- Check with your local municipality: tell customers to dispose of products in **recycling bin** as the vast majority of municipalities recycle #2 plastics.
- Check with your local retailers: some retailers have packaging **take-back programs**.

Conclusion:

- We view ocean plastic as a **stranded resource** and our goal is to remove plastic from the ocean and reintroduce it to the marketplace and proper waste stream.
- There is simply no reason to use virgin petroleum-based resins, especially for single-use products, like packaging.
