

TedStuff  
Modern. Elegant. Fun.

# Welcome to TedStuff,

a labor of love I started to help share my passion for contemporary aesthetics and architectural design. While working on a home renovation project I was frequently disappointed with the lack of modern design options and poor build quality of most home products available in the marketplace. So, I decided to put my degree in architecture and my extensive experience in metal manufacturing to good use.

At TedStuff, our mission is to elevate the everyday by crafting modern, elegant and fun pieces that seamlessly integrate into your home. All our products are designed and manufactured at our facility in Delray Beach, Florida, are exceptionally well built from quality materials and are easy to install and maintain.

To find out more, visit us online at [tedstuff.com](http://tedstuff.com) and check out our metal machining capabilities and other products at [juracsiktool.com](http://juracsiktool.com) and [tiberreel.com](http://tiberreel.com)

# The CleanPlate

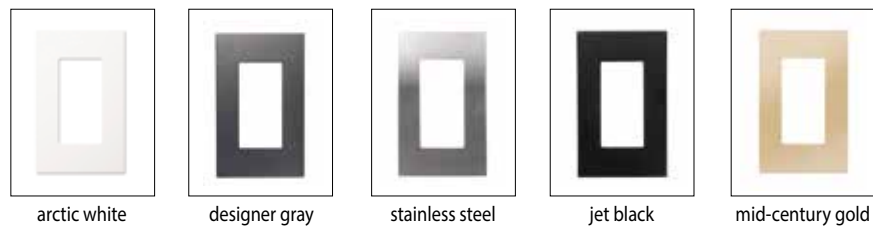

The CleanPlate is a screwless retrofit cover plate that replaces new and existing switch and socket cover plates with a fresh and modern look. What makes the CleanPlate different from other covers is that it can be custom laser engraved to identify each switch, eliminating confusion. The CleanPlate uses high powered magnets and can be easily removed and replaced for cleaning, painting and maintenance.

**Fonts:** Arial **COPPERPLATE** Times New Roman

## Includes free engraving

## Easy Instructions:

1. Turn off power.
2. Remove old cover plate.
3. Align backing plate into place

4. Tighten included screws down.
5. Adjust switches to level them out.
6. Snap on clean plate.

# The CleanPlate Classic

The CleanPlate Classic is an old-style toggle and socket version of the CleanPlate. Update the look of your room and keep your existing switches!

What makes the CleanPlate Classic different from other covers is that it can be custom laser engraved to identify each switch, eliminating confusion.

The CleanPlate Classic uses high powered magnets and can be easily removed and replaced for cleaning, painting and maintenance.

## Easy Instructions:

# The CleanVent & CleanVent Intake Cover

The ceiling vent is one of the most overlooked details in a room. The low profile CleanVent sits flat against your ceiling making it non obtrusive. It adds a touch of style while eliminating the cluttered look of protruding vents.

The CleanVent is a magnetic, screwless, retrofit vent cover featuring hidden air flow tabs. It is easily repositioned when installed, which solves the problem of improperly installed, crooked or misaligned vents.

### What is included:

- Inner Baffel
- Cover Screen
- CleanVent Designer Cover
- 4-6 magnets with self-tapping screws.

### What is needed to install:

- Pencil for marking
- Phillips Head Screwdriver
- Cordless Drill with Phillips Head  $\frac{3}{32}$ " Drill Bit

Each CleanVent is manufactured in the USA out of 19-gage powder coated steel, (not plastic). The CleanVent and defusing screen are powder-coated in gloss white and can be painted. The inner air flow tabs are .040" stainless steel and can be positioned in any direction.

**CleanVent Covers:** Available in 9 patterns & many standard sizes. Custom laser cut sizes and patterns are available by request.
