lucyd®
upgrade your eyewear™

WHAT'S IN THE BOX:

Fold-flat case. Insert glasses upside-down with lenses facing away.

Lucyd Lyte e-glasses. Will automatically power on and enter pairing when disconnected from charger. Select "Lucyd Lyte" in Bluetooth menu to connect.

Cleaning cloth.

Slip case. Soft storage case for protecting your lenses from scratching.

USB charger. Connect to both arms of the glasses. Red lights on glasses will turn off when charging complete.

FEATURES & CONTROLS:

Charging ports. Connect to both ports with cable to charge both arms. Lights on each arm will shine red until charging is complete. Fully charges in 2 hours.

LEDs. Left arm light flashes red/blue when pairing, and solid blue when connected.

Optical frontplate. All Lucyd frames have fronts that can be adjusted like normal eyeglasses. Non-Rx lenses can be swapped by hand.
Left touch button.
Hold for 3 seconds to power on left arm. Single click to go down one volume notch. Double click to pause/play. Triple click to skip back a track.
Hold either button for 2 seconds to initiate the voice assistant.
Hold either button for 7 seconds to power off both arms.
Right touch button.
Hold for 3 seconds to power on right arm. Single click to go up one volume notch. Double click to pause/play. Triple click to skip ahead a track.
Hold either button for 2 seconds to initiate the voice assistant.
Hold either button for 7 seconds to power off both arms.

GETTING STARTED

1. Charging
Connect cable to magnetic ports on both arms. When red lights shut off, charging is done.

2. Power On
Press both touch buttons for 3 seconds or disconnect from charger to power on.
3. Pair in Bluetooth Menu
Select "Lucyd Lyte" to pair. Delete pairing to connect to a different device.

4. Ready to Rock!
Your glasses will now act just like a wireless headset, ready for music and calls.

SMART FEATURES

Hold either touch button for 2 seconds to activate the voice assistant, wait for the prompt tone, then speak a voice command.

Below commands are for iPhone, Android voice commands differ slightly.

1. **"Send a voice message to (contact)":** This command begins the recording of an audio message to be sent to named contact.

2. **"Send a text to (contact)":** Begins recording of a speech-to-text message to be sent by SMS to named contact.

3. **"Call (contact)":** Speed-dials the named contact.

4. **"Send $ ___ to (contact)":** This command allows you to send money to a contact via Venmo or Apple Pay. Follow the Siri prompts to confirm.

5. **"Check my messages":** This command will read out your latest incoming text messages and offer a prompt to reply to each. Close out Siri on your phone to end the readout.

6. **"Check my mailbox":** This command will announce your number of unread emails, and read them out with a prompt to continue after each one. In the prompt after each one, you can tell Siri **"Reply"** to dictate an email response to the previous email.

7. **"Find (cuisine type) food nearby":** This command will read through a list of nearby restaurants and their ratings, and prompt you for directions or to call after each one.

8. **"Call me an Uber":** This command will prompt you on which type of Uber ride you want, then ask to confirm to send a car to your location.

9. **"What time is it?":** Announces the current time.

10. **"Play (song/album/artist)"** Begins playing the requested song, album or artist via Apple Music.

11. **"Get me directions to (location)":** Begins navigating on phone, with audible directions on glasses.

12. **"Take a memo":** Begins recording a speech-to-text memo in Notes. Say **"Read my Notes"** to play back.
