Battery Installation

Remove the battery compartment cover and insert 3 x AA batteries (not included).

Make sure the batteries are inserted the correct way around according to the markings.

Never mix new and old batteries.

Always use high quality branded batteries.

Never mix alkaline, standard (carbon-zinc) or rechargeable batteries.

Use a standard USB phone charger (5V, 2A) to power your clock using the supplied USB cable.

Setting the Time

Press TIME SET for 2 seconds for time setting mode.

The sequence for setting the time is HOUR, MINUTE, 12/24.

Press UP and DOWN to adjust the digit. Hold UP and DOWN for more than 2 seconds to adjust the digit faster.

Press TIME SET to move to the next setting.

The time setting mode will confirm and exit automatically after 30 seconds of inactivity.

When using the 12hr mode a PM icon will appear to indicate the afternoon.

Once all settings are correct, press TIME SET to confirm and exit the time setting mode.

Other Settings

Hold TIME SET for 2 seconds for time setting mode.

Press TIME SET to switch between Time Temperature and night mode status.

The backlight only works continually when a DC adaptor/USB cable is connected.

Batteries must be installed to ensure the time is stored and not lost during a power outage.

When using batteries only, press any button or pat the clock to light the screen for 10 seconds. The light switches off after 10 seconds to preserve your battery when the USB cable is not connected.

Setting the Alarm

Press ALARM SET once to display the Alarm time.

Press ALARM SET for 2 seconds for alarm setting mode. The sequence for setting the alarm is HOUR, MINUTE. The default Alarm time is 6:00am.

Press UP and DOWN to adjust the digit. Hold UP and DOWN for more than 2 seconds to adjust the digit faster.

Press ALARM SET to move to the next setting.

Once the time is correct, press ALARM SET to confirm and exit the alarm setting mode.

Press the ALARM ON/OFF button to turn the alarm on and the AL icon will be displayed.

When the alarm is triggered it will sound for one minute.

Press any button to turn the alarm off, the alarm will turn off automatically after one minute.

Temperature Function

The temperature display will show room temperature between 0 and 50°C (32-122°F). Above 50°C will display as HH (high high/maximum temperature reading reached). Below 0°C will display as LL (low low/minimum temperature reading reached).

To change the temperature unit, when in temperature display mode, press DOWN to switch between °C and °F.

Backlight Level Settings

When using batteries only, press any button or pat the clock to light the screen for 10 seconds. The light switches off after 10 seconds to preserve your battery when the USB cable is not connected.

When a DC adaptor/USB cable is connected press UP to select the backlight brightness. There are four brightness levels:

Maximum brightness

Medium brightness

Low brightness

OFF (press any button or pat the clock to light the screen for 10 seconds)

Display Mode

Press TIME SET to switch display between the time, temperature and night mode on or off.

To activate the automatic display cycle. Press and hold UP for 3 seconds, this means the display will cycle between time for 10 seconds and temperature for 5 seconds.

Press UP for 3 more seconds to exit the automatic display cycle mode.

Night Mode Setting

When active, night mode will automatically dim the backlight during specified hours.

If the clock brightness is set to OFF, night mode will not function.

Press the TIME SET button twice to display the night mode status then press UP or DOWN to turn the night mode ON or OFF.

When displaying the night mode status, press TIME SET for 3 seconds to enter the night mode time setting. The setting sequence is START HOUR, START MINUTE, END HOUR, END MINUTE.

Press UP and DOWN to adjust the digit. Hold UP and DOWN for more than 2 seconds to adjust the digit faster.

Press TIME SET to move to the next setting.

Once the time is correct, press TIME SET to confirm and exit the night mode setting.

After the night mode is turned on the brightness will automatically change to low brightness.

Maintenance

When cleaning, we recommend a light dusting with a soft, clean and dry cloth only. The use of liquids and cleaning agents may damage the finish of your clock.

Please keep your clock out of direct sunlight to protect it from harmful UV rays that may discolour the screen or case. This clock is for indoor use only.

Guarantee

Should you experience any difficulties with your clock, it is guaranteed for two years from the date it was purchased. For assistance please contact the store it was bought from along with your receipt, or contact us at hello@newgateworld.com
