

# WOODEN DISPLAY ASSEMBLY INSTRUCTIONS

## Items Included

- A** - 1 unit (back of display)
- B** - 2 units (sides of display)
- C** - 1 unit (divider shelf)
- D** - 2 units (shelving)
- E** - 2 units (front shelf casing)
- F** - 6 units (dividers)

## Step 1

Place 1 of your sides of the display (**B**) on its side and take the back of the display (**A**) and connect the two.

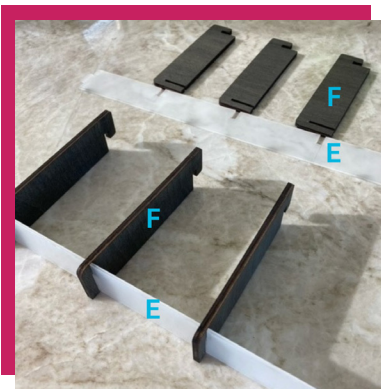

## Step 2

Take your divider shelf (**C**) and place it on the side of the display (**B**) parallel to your display back as seen in the photos.

## Step 3

Next, take both of your shelves (**D**) and insert them into the side of the display (last 2 holes) that runs perpendicular to both your divider shelf and display back. Set aside.

## Step 4

Next, take 1 of the front shelf casing (**E**) and place 3 of the dividers in the 3 slits. See image on left. Complete this step with the next front shelf casing and dividers.

## Step 5

Tilt divider inserts vertically and insert them in the last two inserts on the side of display (**B**) piece. Lastly, take the other side of the display (**B**) and place it on the facing up portion of the display that was just assembled. This will secure the display.

## Step 6

### Tada...

Note: you may need a little extra muscle to get all of the pieces to click in once that last side of display piece (**B**) goes on.
