

OPERATING INSTRUCTIONS

MOTION SENSOR LED NIGHT LIGHT

CP-BPLL3

PRODUCT

INSERT BATTERIES

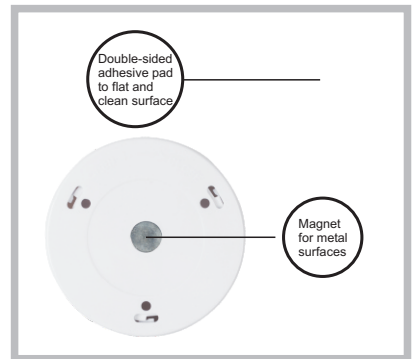

- Twist and then remove the cover.
- Insert 3 AAA 1.5V batteries (not included in the package) into the battery compartment.

MOUNT THE LIGHT

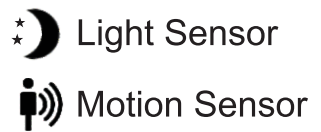

Two methods are available to mount the light wherever you need.

- A. Use the included double-sided adhesive 3M pad.
1. Peel and remove the liner from one side of the 3M pad and stick the pad to the back side of the night light.
 2. Remove the remaining liner of the 3M pad and stick the night light to any flat and clean surface.
- B. Use the built-in magnet to stick the night light to metal surface.

HOW IT WORKS

The LED night light is equipped with a light sensor and a motion sensor. When darkness is detected by the light sensor and a motion is detected by the motion sensor within its 7Ft and 120-degree detection range, the light will turn on and automatically turn off after 15-30 seconds of inactivity.

SPECIFICATIONS

Item No. : CP-BPLL3
Power: 3 × AAA 1.5V batteries (not included in the package)
LED life: 30000 hours
Voltage: 4.5V
Wattage: 0.6W
Unit dimension: 3.14 × 3.14 × 0.67 inches
