

Template Note:

This template is designed for 11" x 17" paper, which is a bit larger than standard printer size. If you're using a regular home printer, no worries! Just be sure to check your printer settings and select the "tile pages" or "poster" option. This will break the template into sections that you can print on multiple pages, trim, and glue together for the full-sized pattern. A little extra effort for a perfectly sized bow—totally worth it!
