

# Slimey Fun!

Preschoolers At-home  
Uniquely Achieving

## What you need:

- 1/2 C warm water
- 1/2 C PVA glue
- Glitter
- Food colouring
- 1 medium bowl
- A mixing spoon

## Borax solution:

- 1/2 C of hot water
- 1 tsp of Borax powder (we bought ours from Bunnings)

## What to do

1. Pour half a cup of PVA glue into your bowl
2. Add half a cup of water to your PVA glue and mix well. Make sure it's completely combined.
3. Once the PVA and water are mixed well, you can add in a little food colouring and glitter if you wish.
3. In a separate cup make up the borax solution by combining half a cup of hot water with 1 tsp of borax powder, and stir until most of the borax is dissolved.
4. Add the borax solution to the glue and water mixture, and mix really well for a few minutes. The solution will start to come together.
5. Once the solution is combined, take it out of the bowl and knead lightly on a bench. It might seem very wet at first but keep kneading, you'll be surprised at the result!

## Storing

You can store your slime in a ziplock bag or a sealable plastic container. The slime will keep for at least a few weeks, up to a month. Over time the slime can become sticky, or brittle, and often gets bits of dirt and dust in it. And that's about the time to whip up another batch and see what else you can create!

All activities are intended to be performed with adult supervision.

As your child's parents/guardians, you will need to decide what you feel is safe for your family.

We encourage you to seek professional medical advice if you are not sure about the safety/age appropriateness of an activity. Appropriate and reasonable caution should be used when activities call for the use of materials that could potentially be harmful. Please observe caution and safety at all times.
