

VALV-POWR® SERIES VPVL MODEL C DOUBLE-ACTING AND SPRING-RETURN RACK- AND-PINION COMPACT PNEUMATIC ACTUATORS

VALV-POWR – VPVL double-opposed piston actuators combine the benefits of high cycle life, a rugged construction, and an extremely compact and symmetrical design with a unique range of features and options. They are specifically designed for fast efficient operation of ball, butterfly, and other rotary type valves.

FEATURES

Single-Source Responsibility

- Valves, actuators, and accessories are designed to operate as a unit with the highest degree of compatibility.
- Valves, actuators, and accessories can be supplied completely assembled to provide unit responsibility from a single source.

Versatility

- Modular designs with same body and end caps for double-acting and spring-return reduce inventory. Springs can be added in the field to convert double-acting to spring-return or for changes in supply pressure.
- Failure direction can be easily reversed from spring-to-open or spring-to-close orientation simply by inverting the pistons.
- Actuator to valve attachments comply with ISO 5211.
- Solenoid valve and accessory attachments comply with NAMUR VDI/VDE 3845.
- A wide range of optional accessories and control devices that include limit switches, solenoid valves, and mechanical safety lockouts are available to satisfy virtually all automated valve requirements.
- Several models of 180 degree VPVL's are optionally available.

High Cycle Life

- Bearings on all sliding and rotating moving parts to ensure long life.
- Dual piston rack-and-pinion mechanism for simple construction, high cycle life, and constant torque.
- Hard-anodized PTFE-coated extruded aluminum body with honed internal surface for strength and lower coefficient of friction.
- Mechanically multi-guided aluminum pistons for precise movement, low friction, and high cycle life.
- Machined teeth on piston racks and pinions for excellent rack and pinion engagement and maximum efficiency.
- Extended temperature range option decreases cycle life.

Corrosion Resistant

- Hard-anodized PTFE-coated body, polyester-coated end caps, and epoxy-coated springs, along with internal and external stainless steel fasteners, provide corrosion resistance in a variety of difficult applications and environments.

Reliability

- Safety-contained multi-spring design with preloaded and heavy-duty coated springs for simpler range versatility, greater safety, and corrosion resistance.
- External adjustable stops in both directions assure flexibility and accuracy when setting the valve in the open and closed positions.
- As an added safety feature, the external adjustment screws are slotted. The slot will indicate the presence of internal pressure. Pressure will begin to vent before the adjustment screws are completely backed out of the actuator.

SPECIFICATIONS

Maximum Supply Range: 116 psi (8 bar)

Temperature Range:

Standard -4°F to +176°F (-20°C to +80°C)

Options -40°F to +300°F (-40°C to +150°C)

-60°F to +176°F (-51°C to +80°C)

Rotation Adjustment: -4° to +4°; 86° to 94°

Supply Media: Air, mineral-based hydraulic fluid

STANDARDS

Actuator to valve mounting: ISO 5211

Actuator to solenoid mounting: Namur, VDI/VDE3845**

Actuator to accessory mounting: Namur, VDI/VDE3845*

* Except VPVL011

** Except VPVL011, 650, 700, 800

ACTUATOR SELECTION

To select an actuator for a particular valve and service, first determine the maximum operating torque that will be required from the applicable valve bulletin. Then refer to the appropriate torque output table and select an actuator that will, at the available supply pressure, provide a torque output no less than the required operating torque for the

valve. For spring-return units, both the spring torque and the air torque must be sufficient. In the event confirmation is desired for the selection of an actuator under specific service conditions, include full details on trim, seat materials, and media characteristics.

OPTIONS

Solenoid Valves

Direct-mounted solenoid valves are available in both 3-way and 4-way configuration, which mount directly to the actuator in accordance with NAMUR and VDI/VDE 3845 standards, excluding the VPVL011, 650, 700 and 800. In general, 3-way solenoids are used for spring-return actuators and 4-way versions for double-acting.

Direct-Mount Solenoid Valves		
Part Number	031-0576-01	031-0580-01
Enclosure	NEMA IV	NEMA VII
Configuration	3 or 4-way	
Pipe Size	1/4" Inlet, 1/8" Exhaust	
Cv	0.7	
Voltage	Standard: 120 VAC 60 Hz (110/50) Optional: 240 VAC 60 Hz, 12 VDC, 24 VDC	
Body Material	Black Anodized Aluminum	
Power Consumption	AC: 6.9 watts or DC: 6.3 watts	
Humidity Resistant	Feature rebreather and are suitable for humid & tropical environment	

NOTE: Please consult factory for other solenoid valves or additional options including special voltages, double solenoids, special electrical connections, etc.

Mechanical Safety Lockout

To comply with the intent of OSHA requirements for locking actuators in position prior to performing maintenance, an actuator can have the mechanical safety lockout option added to it. Design of the stop cam allows for locking the actuator in either the full-open or full-closed position. Actuators equipped with this option have a special lockout screw and a tamperproof cover attached to the housing of the actuator with stainless steel wire. The lockout kits are readily available to permanently lock the actuator in place to prevent unwanted operation.

100% Adjustable Travel Stop

To limit the rotation on the stroke beyond the standard $\pm 4^\circ$ of a VPVL actuator, a stainless steel 100%-adjustable travel stop option can be added. The stops, located in the

end caps, allow the valve position to be set anywhere between full closed and full open. This option limits travel of only the counter-clockwise stroke for standard double-acting and spring-closed units. The 100% Adjustable Stop option is specified in the actuator ordering code.

Declutchable Manual Override

A side-declutchable manual override is available for VPVL actuators. It consists of a manual gear actuator mounted between the actuator and the valve. The device is normally disengaged from the shaft. Upon engagement of the override clutch, overriding the actuator is done with ease, aided by the high-reduction ratio of the manual gear unit.

BILL OF MATERIALS AND PARTS LIST

No.	Unit Qty	Part Description	Material	Specifications	Corrosion Protection
1	1	Octi-Cam (Stop Arrangement)	Stainless Steel ¹	EN 10088-3/ISO 1083 ¹	
2	2	Stop Cap Screw	Stainless Steel	ASTM A193	
3	2	Washer (Stop Cap Screw)	Stainless Steel	ISO 3506	
4	2	Nut (Stop Cap Screw)	Stainless Steel	ISO 3506	
5*	2	Bearing (Piston Back)	Polyphthalamide	Amodel ET1001HS	
6*	1	Bearing (Pinion Top)	Polyetherimide	Stanyl TW300	
7*	1	Bearing (Pinion Bottom)	Polyetherimide	Stanyl TW300	
8*	2	Thrust Bearing (Pinion)	Polyphthalamide	Amodel ET1001HS	
9*	2	Plug (Transfer Port)	Nitrile Rubber	NBR 70Shore A	
10	1	Thrust Washer (Pinion)	Stainless Steel	EN 10088-3	
11*	2	O-ring (Stop Cap Screw Seal)	Nitrile Rubber	NBR 70Shore A	
12	2	Piston Guide	Polyphthalamide GF	Amodel AS1145	
13	8/12/ ²	Cap Screw (End Cap)	Stainless Steel	ISO 3506	
14*	2	O-ring (End Cap)	Nitrile Rubber	NBR 70Shore A	
15*	2	Bearing (Piston Head)	Polyphthalamide	Amodel ET1001HS	
16*	2	O-ring (Piston)	Nitrile Rubber	NBR 70Shore A	
17	min. 4/ max.12	Spring (Cartridge)	Alloy Steel	DIN 17223 Part2	Epoxy Coated
18	1	Spring Clip (Pinion)	Carbon Steel	DIN 17222	ENP
19	1	Position Indicator	Polypropylene GF	Hostalen PPN	
20*	1	O-ring (Pinion Bottom)	Nitrile Rubber	NBR 70Shore A	
21*	1	O-ring (Pinion Top)	Nitrile Rubber	NBR 70Shore A	
30	1 ³	Right End Cap ³	Aluminum	UNI 5075	Polyester-Coated
31	1 ³	Left End Cap ³	Aluminum	UNI 5075	Polyester-Coated
39	1	Cap Screw (Indicator)	Stainless Steel	ISO 3506	
40	2	Pistons	Aluminum	UNI 5075	Anodized
41	1	Actuator Identification Label	Polyester Aluminum		
42	2	End Cap Label	Polyester Aluminum		
50	1	Body	Aluminum	ASTM B221	Anodized PTFE-Coated
60	1	Drive Shaft	Carbon Steel Plated	ASTM A105	ENP

* Suggested spare parts for maintenance

Notes: (1) AISI 420 for models VPVL-051 through 300; GS400-15 for models VPVL-350 through 800

(2) Qty 8 pieces for models VPVL-051 through 600; Qty 12 pieces for model VPVL-700

(3) For models VPVL500 through VPVL700, right and left end-caps are symmetric

HOW TO ORDER

To specify a complete VALV-POWR VALUE-LINE® Actuator, simply make a selection from the code boxes below.

EXAMPLE: VPVL 400 SR4/5 B AS C, shown below, is a 59 FT•LBS 60-psi (84 N•m @ 4.2 bar) spring-return actuator with spring-to-close rotation, hard-anodized PTFE-coated body, polyester-coated end caps, standard temperature rating, and 100% adjustable travel stops.

1	2	3	4	5	6	7
VPVL	400	SR4/5	B	AS	C	—

NOTE: for multiple options, specify them in order as listed in Item 5, for example: VPVL400 SR4/5 B HT AS Model C.

1	Product Group
VPVL	VALV-POWR VALUE-LINE Double-Opposed Piston Actuator

2	Size
011, 051, 100, 200, 250, 300, 350, 400, 450, 500, 550, 600, 650, 700, 800	Select from torque table

3	Series+
DA	VALV-POWR VALUE-LINE Double-Opposed Piston Actuator
SR4/5	Spring-Return 60-psi (4.1 bar) Spring-to-Close (CW Rotation)
SR6	Spring-Return 80-psi (5.5 bar) Spring-to-Close (CW Rotation)

+ Other spring rates on application

4	Exterior Protection*
B	Hard-Anodized PTFE-Coated Body & Polyester-Coated End Caps

* Consult factory for other protection options.

5	Options
—	Standard Temperature Rating: -4°F to +176°F (-20°C to +80°C)
HT	High-Temperature Rating: -4°F to +300°F (-20°C to +150°C)
LT	Low-Temperature Rating: -40°F to +176°F (-40°C to +80°C)
LX	Low-Temperature Rating: -60°F to +176°F (-51°C to +80°C)
FO	Spring-to-Open (CCW Rotation)
AS	100% Travel Stop
LD	Mechanical Safety Lockout

Note* "LX" option must be ordered complete from the factory.

6	Model
C	Model C

7	Modifier Code
—	Standard
XB	ATEX Approval
