INSTRUCTIONS: COAST G26 FLASHLIGHT

USING THE LIGHT

Designed with a COAST Bulls-Eye™ Spot Beam for the pinpoint lighting of a precise area, the G26 also features a COAST Quick-Cycle™ Switch for easy control of the dual-output light modes. While the flashlight is off, partially depress the power button to toggle between high and low brightness settings. Completely depress the power button to turn on the flashlight in the desired setting. To turn off the G26, completely depress the power button.

POWERING THE LIGHT

The G26 can be powered with two COAST Extreme Performance AA Alkaline Batteries. To replace the batteries, unscrew the tailcap of the flashlight to access the battery compartment. Remove the old batteries, discard them, and insert two new AA batteries with the positive terminal oriented toward the front of the flashlight.

GO RECHARGEABLE!

Designed with COAST Dual Power technology, the G26 can also be powered with a COAST ZITHION-X™ Rechargeable Battery (Sold Separately). To charge the ZITHION-X™, unscrew the tailcap and remove the rechargeable battery from the battery compartment. Plug the USB Charging Cable into USB Charging Port of the ZITHION-X™ battery. Then plug in the cable at an available power source.

WARRANTY

For expedited warranty service, as well as discounts and exclusive access to other COAST products, visit: coastportland.com

CAUTION

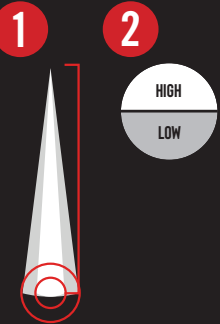

When replacing alkaline batteries, do not mix old and new batteries.

Do not use an aftermarket rechargeable battery to power your G26.

Never submerge your G26 Flashlight in any liquid.
