COAST®

INSTRUCTIONS: COAST G9 FLASHLIGHT

USING THE LIGHT

Designed with a COAST Inspection Beam LED optic, the G9 produces a uniform beam with a crisp edge and low glare. To turn on the G9, rotate the tailcap clockwise. Rotate the tailcap counterclockwise to shut off the LED.

MOUNTING THE LIGHT

The G9 is equipped with a sturdy, two-way clip for secure storage and hands-free use. To mount the flashlight on a hat, first turn on the Inspection Beam LED. Then slide the two-way clip over the bill of a cap.

POWERING THE LIGHT

The G9 is powered by one COAST Extreme Performance AAA Alkaline Battery. To replace the batteries, unscrew the tailcap of the flashlight and access the battery compartment. Remove the old battery from the battery cartridge, discard it, and place a new AAA battery in the battery compartment with the positive terminal oriented toward the bezel of the flashlight. COAST Extreme Performance Batteries can be purchased on coastportland.com/ep.

CLEANING THE LIGHT

To clean the G9, wipe the exterior of the flashlight with a damp rag. Never submerge the G9 in any liquid.
