INSTRUCTIONS: COAST EAL12 EMERGENCY AREA LIGHT

USING THE AREA LIGHT
Use the Power Button to turn on your EAL12, as well as cycle through all four lighting modes—low, high, red, and flashing red.

POWERING THE AREA LIGHT
The EAL12 is powered by 4 x AA Alkaline Batteries. To replace the batteries, twist the base of the area light counterclockwise and remove the base-cap to expose the battery compartment. Remove all 4 old batteries, discard, and install 4 new batteries. When reinstalling the basecap, be sure rotate clockwise until it locks into place with an audible click. COAST Extreme Performance Alkaline Batteries can be purchased separately on coastportland.com.

Note: Do not mix old and new batteries.

HANGING THE AREA LIGHT
The EAL12 was designed with integrated folding hooks for hanging. When both hooks are folded up they form a handle.

CLEANING THE AREA LIGHT
Use a damp cloth to wipe down the body of the area light.

Caution: Never submerge the EAL12 in any liquid.

WARRANTY
The EAL12 is protected by a COAST 5 Year Warranty. For expedited warranty service, as well as discounts and exclusive access to other COAST products, join the COAST Crew at coastportland.com/join.
