INSTRUCTIONS:
COAST PX19R FLASHLIGHT

INSTRUCTIONS: COAST PX19R FLASHLIGHT

COAST PX19R

LIGHT SETTINGS
To turn on the PX19R, click the power button on the tail cap. The light will start on the Medium light mode, then cycle to High, then Turbo, and finally to Low.
To cycle from one light mode to the next, quickly click the power button two times.

The PX19R is also equipped with Coast's Quick-Cycle™ technology. Lightly pulse the power button to preview each mode. Fully click the power button once you've found your desired mode to select it. A single click of the power button from any mode will turn off the light.

FOCUSING
To adjust from Ultra-View Flood beam to Bulls-Eye™ Spot beam, twist the bezel clockwise.

POWER
The PX19R can be powered by the Zithion-X® rechargeable battery, or three AAA alkaline batteries.

To charge the Zithion-X® rechargeable battery, insert the USB-C charging cable into the charging port on the battery and connect to a power source. The battery charge indicator will glow red while actively charging and change to green once the light is fully charged.

Caution: The PX19R is designed for use with the COAST Zithion-X® rechargeable battery. Do no use aftermarket rechargeable batteries.
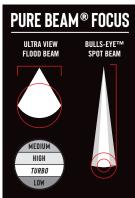

MAINTENANCE
To clean your PX19R wipe the external body of the flashlight with a damp cloth. Note: Do not submerge the PX19R

WARRANTY
At COAST, we stand behind everything we make. For warranty information specific to your country, please visit www.coastportland.com/warranty
