INSTRUCTIONS:  
COAST G32 FLASHLIGHT

**USING THE LIGHT**  
The G32 features a dual-setting lighting sequence that is controlled with COAST's QUICK-CYCLE™ Switch. Before turning on the flashlight, partially depress the power button and toggle between high and low brightness settings. Completely depress the power button to turn on the flashlight in the desired setting. To turn off the G32, completely depress the Power Button.

**ADJUSTING THE BEAM**  
Equipped with COAST TWIST FOCUS™ Technology, the G32 Flashlight can be adjusted between an Ultra-View Flood Beam and a BULLS-EYE™ Spot Beam. To pinpoint the beam on a precise area, rotate the bezel of the flashlight clockwise. To expand the beam and maximize the lighting area, rotate the bezel counterclockwise.

**POWERING THE LIGHT**  
The G32 can be powered with two COAST EXTREME PERFORMANCE AA Alkaline Batteries. To replace the batteries, unscrew the tailcap of the flashlight and expose the battery compartment. Remove the old batteries, discard them, and insert two new AA batteries with the positive terminal oriented toward the front of the flashlight.

**GO RECHARGEABLE!**  
Designed with COAST Dual Power technology, the G32 can also be powered with a COAST ZITHION-X™ Rechargeable Battery (Sold Separately). To charge the ZITHION-X™ battery, unscrew the tailcap and remove the rechargeable battery from the battery compartment. Plug the USB Charging Cable into the USB Charging Port of the ZITHION-X™. Then plug in the cable at an available power source.

**WARRANTY**  
For expedited warranty service, as well as discounts and exclusive access to other COAST products, visit: coastportland.com

**CAUTION**  
When changing alkaline batteries, do not mix old and new batteries.

Do not use an aftermarket rechargeable battery to power your G32.

Never submerge your G32 Flashlight in any liquid.
