

COAST®

INSTRUCTIONS: COAST G56R FLASHLIGHT

USING THE LIGHT

Equipped with a Pure Beam® Optic, the G56R features a three-setting lighting sequence that is controlled with a COAST Quick-Cycle™ switch system. Before turning on the flashlight, partially depress the power button to cycle through medium, high, and low brightness settings. Completely depress the power button to turn on the flashlight in the desired setting. To turn off the G56R, completely depress the power button.

ADJUSTING THE BEAM

Equipped with COAST's patented Twist Focus™ technology, the G56R Flashlight can be continuously adjusted between a Pure Beam® Flood and a Bulls-Eye™ Spot Beam. To pinpoint the beam on a precise area, rotate the bezel of the flashlight clockwise. To expand the beam and maximize the lighting area, rotate the bezel counterclockwise.

POWERING THE LIGHT

The G56R can be powered by the Zithion-X® rechargeable battery (included), or four AAA alkaline batteries (not included), or a Zithion-X® rechargeable battery ZX865 (not included) for increased runtime.

To charge the Zithion-X® rechargeable battery, insert the USB-C charging cable into the charging port on the battery and connect to a power source. The battery charge indicator will glow red while actively charging and change to green once the light is fully charged.

Caution: The G56R is designed for use with the COAST Zithion-X® rechargeable battery. Do not use aftermarket rechargeable batteries.

CLEANING THE LIGHT

To clean the G56R, wipe the exterior of the flashlight with a damp rag. Never submerge the G56R in any liquid.

WARRANTY
