## Build a BOS: As Easy as 1,2,3,4

## BOS Containers: the perfect answer to awkward locations with limited access

BOS Quick Build portable storage units can be delivered flat pack to site and assembled within minutes. Quick tool free assembly and dismantling make BOS Containers the perfect solution for tight locations. They are completely weatherproof, theft proof and secure using state of the art 'Best Point Technology' to join components together.

BOS Quick Build containers are a versatile solution for building sites, storage, warehousing, farming and much more. The containers offer flexible solutions to meet your changing requirements. They can be joined, stacked and dismantled as needed and can be used both indoor and outdoor.

30 years of German engineering is now available in Australia through Aim Hire.

Call us today to enquire about hire or purchase of the BOS Quick Build Container.

# THE BEAUTY OF THE BOS QUICK-BUILD CONTAINERS IS...

that they allow for increased flexibility in responding to changes in market demand without large investments in buildings and equipment.

Up to 3 Quick Build containers can be connected using the proprietary BOS Connection Kits. The same or different size units can be connected end-to-end (up to 2 containers) or the same size units can be connected side-by-side (up to 3 containers). With easy dismantling they can be relocated at any time.

Assembled units can be stacked three units high outdoor and four units high indoor (the load inside the units must be evenly distributed).

The BOS Containers have no welding. Instead the connection points are made with BTM clinching. This clinching technique simply joins the steel parts together and ensures the galvanized surface does not get damaged. So the joints are durable and maintenance free with a 10 year corrosion protection guarantee.

BOS Quick Build containers come in multiple sizes and with a variety of accessories to suit your needs. Perfect for building sites, solid garden sheds, storing valuable items, and for portable storage.

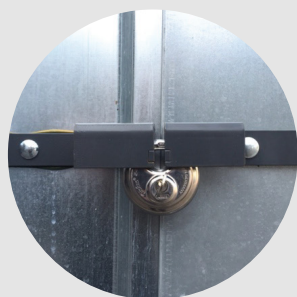

## Accessories:

- Access ramps
- Galvanised anti-vandal lock
- Hose, Cable & Tool Racks
- Shelving systems
- 4-way forklift pocket systems
- Connection Kits
- Powder Coating
