2 1/2"	6 1/4"	1.979"	6"	2.00"	5/8"	

The above tapers are what we consider to be Admiralty Standard tapers. Taper lengths C and F can vary, subject to original supply. Threads on older supply could differ. Imperial threads were usually B.S.F. or B.S.W.

If in doubt we would require accurate taper dimensions and key width. It is most important that the dimensions supplied are correct as it is not always possible to rectify.

Standard METRIC tapers – 1:10
